DATWYLER

Datwyler IT Infra is an international company with its headquarters in Switzerland and affiliates in Europe, the Middle East and Asia. Datwyler enables organizations around the world to run their IT infrastructures seamlessly and scale their business with ease. The well-established company which was founded more than 100 years ago has successfully acted as a supplier of innovative system solutions and products for data centres, fibre networks, and intelligent buildings as well as the lead or main contractor who covers the whole value chain in these markets.

MILESTONES

1915 Adolf Dätwyler founded the company and began producing electrical conductors using aluminium.

1926 The production of telephone cables began.

1944 The production of high-frequency cables began.

1973 Kaved Ltd. was acquired. The value chain was extended by adding cable harnessing. Datwyler produced the first flat cable for lifts with up to 400 metre shaft height.

1986 The production of fibre optic cables began.

1987 "Uninet" (today: "Datwyler CU") data cables and the future-proof concept for structured building cabling were introduced.

1991 Datwyler fire safety cables successfully passed E90 system circuit integrity testing as per DIN 4102-12.

1998 Datwyler entered the Chinese market.

2002 Optofil Safety (today: "Datwyler FO Universal ... Safety") became the first metal-free fibre optic cable with E30 circuit integrity as per DIN 4102-12.

2005 Datwyler significantly expanded its international distribution network.

2008 Datwyler introduced pre-assembled trunk (multiple) cables and high-density systems that specifically address the demand for efficient data centre cabling.

2009 Datwyler offered complete turnkey solutions for data networks, data centres and fibre networks.

2010 Datwyler became full service main contractor for several FTTx projects in Switzerland.

2011 Datwyler opened a branch in Dubai.

2012 Introduction of the "Datwyler Data Centre Solution" (DCS). Renaming to "Datwyler Cabling Solutions AG" in Switzerland (1 Nov 2012).

2013 Acquisition by Pema Holding AG. The first Cat. 8 data cable "CU 8203 4P" was introduced.

2015 Datwyler introduced "FO Outdoor wbKT Micro Combi", the first mini hybrid cable for NGN and NGA networks.

2016 The Cat.7 data cable "CU 7000 4P Home" with a diameter of only 5.8 mm and the "FO Outdoor wbKT S-Micro 2x24" with a diameter of only 10.4 mm were introduced.

2019 Datwyler introduced the "High-Density Data Centre Solution" (HD-DCS) and its Micro and Mini Data Centres.

QUALITY

QUALITY ASSURANCE

Our management system is ISO 9001, ISO 14001 and BS 18001 certified.

QUALITY SERVICE

At Datwyler, we keep all the major components for our system solutions in stock at all times, and can therefore guarantee fast delivery. We can answer any query promptly and efficiently, with careful consideration towards the current and future requirements of our clients. Our engineering teams deliver projects on time and within budget, and to the correct specification.

STATE OF THE ART TECHNOLOGY

Datwyler invests year-on-year in improved material and process technologies, production equipment and test methods. This is why our system solutions regularly exceed industry expectations. We set new standards.

QUALITY AS A CONSTANT MISSION - WITHOUT COMPROMISE

In practice, the important functions that our system solutions provide, demand the highest levels of safety and reliability. We therefore test and validate every product and system solution using the most stringent quality-control. Quality without compromise is a constant expectation for all of our employees. It is also our guarantee to our customers.

WE SURPASS ALL INDUSTRY STANDARDS

Within the development phase of every product, Datwyler defines quality specifications that go beyond the usual industry standards. In addition to general quality-control inspections, our products undergo application-specific testing. With the help of qualified specialists, Datwyler has developed a series of sophisticated test machines specifically for this purpose. We use these to measure every type of cable and every system component against our own rigorous quality specifications. Such extreme testing procedures ensure that all Datwyler's systems and solutions will maintain their integrity, even under the most demanding conditions.

TURN-KEY PROJECTS

Datwyler serves as your single global contact for IT infrastructure projects. We will ensure quality standards adhered to, and that projects are delivered on time and on budget. Through our certified partner network we are able to efficiently roll-out complete solutions and multi-site projects all over the world. Our transparent project reporting provides our clients with the ability to know the exact status of the project at any time. Comprehensive documentation further ensures the quality of the work.

Material logistics plays an important part in multi-site projects. Together with our logistics partners we ensure that all materials are on-site precisely on schedule, in order that projects can be delivered on time.

SERVICES

Datwyler offers a comprehensive range of services that cover the whole life-cycle of your cabling and IT infrastructure solution. These services that we offer in close co-operation with our certified partners include consulting, engineering, implementation and maintenance:

THE EUROPEAN CONSTRUCTION PRODUCTS REGULATION (CPR) EU 305/2011

Since 1st July 2017 cable manufacturers have been obliged to test power cables and lines as well as control and communication cables permanently incorporated in construction works (fixed installation) for reaction to fire performance requirements in accordance with the new harmonised Standard EN 50575, and to classify and market them with a Declaration of Performances (DoP). The import of products from countries outside Europe makes the importer - according to the CPR - a manufacturer who is responsible for the correct product certification and for putting it on the market.

The EU Commission has approved European test laboratories as notified bodies to test and evaluate the reaction to fire performance of cables for this additional task. The product characteristics of a "construction product" cable must be determined and confirmed by a notified body. By the same token the manufacturer's production facility must be subject to ongoing production control by the notified body.

Following product assessment and production monitoring the notified body authorises the manufacturer to deliver his products with the CE mark and to issue a DoP.

The following criteria are evaluated when testing is carried out in compliance with EN 50575:

- Heat of combustion
- Thermal release
- Vertical flame propagation
- Smoke generation
- Flaming droplets/particles of plastics materials which can contribute to fire propagation
- Acidity

The results of this test should be assigned to the following seven cable classes (Euroclasses):

Main class	Description
A _{ca}	Non-flammable, no contribution to fire; products such as mineral-insulated cables and lines
B1 _{ca}	Low flammability, very limited contribution to fire
B2 _{ca} , C _{ca}	Very limited or limited contribution to fire; cables/ lines without continuous flame propagation; limited fire development and thermal release rate
D _{ca}	Acceptable contribution to fire; products with continuous fire propagation; moderate fire development and thermal release rate
E _{ca}	Normally flammable; cables and lines with acceptable fire behaviour which have flame-retardant characteristics when exposed to a small pilot flame
F _{ca}	Easily flammable; this cable can ignite when exposed to a small flame

Additional classifications are to be determined for classes B1_{ca} to D_{ca}. The fire-critical parameters have been identified as smoke generation, flaming droplets of cable material and the acidity of the combustion gases:

Additional classes for smoke generation in cables:	
s1	slight smoke generation
s1a	s1 with visibility over 80%
s1b	s1 with visibility between 60% to 80%
s2	moderate smoke generation
s3	severe smoke generation

Additional classes for flaming droplets/particles in cables:	
d0	no flaming droplets
d1	short-lived flaming droplets
d2	persistent flaming droplets

Additional classes for acidity in cables:	
a1	slightly corrosive flue gases
a2	moderately corrosive flue gases
a3	severely corrosive flue gases

You will find up-to-date information on the classification of our relevant cables and lines in the product data sheets. Declarations of Performance have been provided with the delivery documentation since 1st July 2017. If a copy of the Declaration of Performances is needed it can be requested via the Datwyler contact address of the relevant country. Declarations of Performance are also available for downloading on the Datwyler website.

The European Construction Products Regulation (CPR) regulates the placing of construction products on the European market – but not their use in construction work. The selection and use of construction products are the responsibility of the European Member States. The requirements governing which fire protection class is specified for which location therefore differ from country to country. Installers and specialist planners must check and comply with the relevant local regulations.

In many countries there were still no mandatory requirements governing the use of fire classes in buildings at 1st July 2017. Where there are still no minimum mandatory legal requirements, there are generally recommendations by the CPR professional associations for application in the relevant countries.

Cables without “CPR classification” may still be installed and used providing there are no national requirements relating to the use of classified cables under Construction Products Regulation. If there already are national requirements relating to application, the use of such cables should be clarified with the authorities responsible.

Cables covered by the CPR but placed on the European market before 1st July 2017 and bearing the CE mark in accordance with the Low Voltage Directive (LVD) may continue to be sold on for an indefinite period.

EXTENDED ARTICLE NUMBERS

In 2017, Datwyler began to gradually extend the article numbers of its cables and other products from 6 to 10 digits. This extension provides our customers with important additional information. The first 6 digits show the "master number" of the articles.

The 9th letter indicates the main Euroclass ("reaction to fire" according to the CPR, European Construction Products Regulation No. 305/2011). The 8th digit stands for the additional classes. The 10th letter shows the packaging (cable length or packing unit).

The key to the 10-digit article number:

As a result of this extension some article numbers have been integrated into the new ones and some totally replaced.

Note:

Our cables are not available in any CPR classification and any length or packing unit (PU) mentioned above. Please refer to our website for the different versions on offer. Here you can also find the Declarations of Performances (DoP) as PDF files for download.

STATEMENT FROM DATWYLER

As an environmentally conscious manufacturer and supplier of cabling solutions it is our concern not to use any environmentally harmful substances in our products.

Based on current information, the hereinmentioned regulations and directives for substances are fully complied with wherever applicable.

MICRO AND MINI DATA CENTRES

Cutting edge solutions for small and decentralised data centres

Our world is becoming increasingly digital, interlinked and intelligent. IoT, automation, 5G, robotics and artificial intelligence are opening up many new applications and business models.

To capitalise the opportunities which come with digitalisation, your organisation must rely on a smart and strategic IT infrastructure.

The amount of data produced will continue to grow exponentially. These data volumes have to be processed close to their source (Edge Computing) due to, among other factors, efficiency and latency times. A lot of mini and micro data centres are needed to do this.

Datwyler is a global player that helps organizations to stay at the forefront of progress, elevating their core business. While you focus on developing your business, we take care of your data centre infrastructure – with a comprehensive of customised product solutions and one-stop service solutions tailored to your needs.

DATWYLER MICRO DATA CENTRE

In a compact 42U rack Datwyler's Micro Data Centre contains a fully preassembled plug-and-play IT infrastructure solution; including a power distribution unit, UPS, cooling system, fire suppression system (optional), air gap sealing and environment monitoring system. It can be deployed within a few hours. The infrastructure can be customised according to customer needs and requirements.

Datwyler's Micro Data Centre is designed for small data centres and applications such as edge computing, computing node in remote and branch offices, floor distributor (FD) and "smart facilities" deploying IoT devices and running Artificial Intelligence (AI), Augmented Reality (AR), Virtual Reality (VR) and automation.

(product may differ from illustration)

Specifications	MDC 100	MDC 200	MDC 300
Height units	42 U	42 U	42 U
Available space	42 U	38 U	30 U
Dimensions (HxWxD)	2200 x 800 x 800 mm	2200 x 800 x 1100 mm	2200 x 800 x 1100 mm
Doors	Closed (glas front and metal back)	Perforated	Closed (glas front and metal back)
Access control	Electronic	Electronic	Electronic
UPS Capacity	-	up to 3 kVA	up to 3 kVA
Back-up time	-	15/30 min @ 50% load	15/30 min @ 50% load
Cooling capacity	-	-	3,6 kW
User interface	Touch screen; web browser	Web browser	Touch screen, web browser
Monitoring	Temperature & humidity, smoke, iPDU, door status	Temperature & humidity, smoke, UPS and batteries, iPDU, door status, alarm status	Cooling, temperature & humidity, smoke, leakage, UPS and batteries, iPDU, door status, alarm status
Alarm	Sound/light alarm, email notification	Sound/light alarm, email notification	Sound/light alarm, email notification
Options	Camera, cabling, ventilation fans, SMS alarm notification, fire extinction system	Camera, cabling, ventilation fans, SMS alarm notification	Camera, cabling, ventilation fans, SMS alarm notification, fire extinction system

Versions

The Datwyler Micro Data Centre is a tailor-made and customised solution to fulfil the customers' specific needs and requirements.

MICRO AND MINI DATA CENTRE

DATWYLER MINI DATA CENTRE

Datwyler's modular Mini Data Centre is a state-of-the-art, pre-assembled plug-and-play IT infrastructure solution. It consists of a 42U rack with integrated power distribution, uninterruptible power supply (UPS), fire suppression system (optional), air gap sealing and environment monitoring system, as well as additional IT equipment racks and an in-row cooling system. It can be deployed within a few hours. It provides multiple ways to configure power and cooling redundancy to meet the current demand while being ready for future technology migration at low cost and with less disruption.

Datwyler's modular Mini Data Centre is designed for applications such as edge computing, small data centre, building distributor (BD), floor distributor (FD) and "smart facilities" deploying IoT devices and running AI, AR, VR and automation.

Specifications

IT load	up to 72 kW
UPS capacity	up to 80 kVA
IT racks	up to 8 (static load 1300 kg / rack)
Backup time	up to 15 mins.
Sensible cooling capacity	up to 75.3 kW (CW or DX)
Dimensions (W x D x H)	(1500 - 6900) x 1400 x 2000 mm
Mounting	Direct on floor or on raised floor
Cable entry	Top / bottom access
Emergency ventilation	Top of the rack and front door

Remote management	Cooling system, UPS, access control, iPDU, environment setpoint and alarm notification
Remote monitoring	Cooling system, UPS, access control, iPDU, power usage effectiveness (PUE), IT load, temperature, humidity and alarm status
User interface	10.4" touch screen and remote web interface
Alarm	Sound/light alarm, email notification

Versions

The Datwyler Mini Data Centre is tailor-made and customised solution to fulfil the customers' specific needs and requirements.

DATWYLER EMS FOR MINI AND MICRO DATA CENTRE

The Environmental Monitoring System (EMS) provides a top level as well as a detailed overview of the status of IT infrastructure housed within the Micro & Mini DC. The system is characterized by real time remote monitoring of environmental conditions, access control and energy consumption of IT infrastructure devices and systems. In case of faults or emergencies the system is capable of alerting the user to take timely and necessary action to protect the mission critical IT systems.

System architecture

HMI touch screen features

- . Flat Touchscreen with multi-touch function
- . Multilingual Web GUI with integrated logic
- . SNMP enabled ports for auto detection of sensors
- . User access management
- . Integrated interface Ethernet, USB, CAN, Analog & Digital
- . Provides notifications and alerts such as E-mail, SMS and SNMP traps
- . Extensive range of sensors for environmental monitoring, security control and power monitoring
- . USB interface for video camera
- . SD card slot for optional SD card (max 64GB)
- . Sim card slot for optional GSM modem
- . Warning alarms for maintenance and critical events
- . Graphical representation of environmental data

COPPER SOLUTIONS

High-grade copper system solutions

Datwyler develops, manufactures and distributes high-grade and futureproof network infrastructure solutions based on copper cabling technology - from analogue telephony to 10- and 40-gigabit Ethernet. These system solutions set standards for quality, reliability and performance and meet all media convergence needs.

With Datwyler copper cabling systems you can always keep up with the constantly increasing transfer rates and exploit the full potential of networks. Thus, they offer high investment security for the future.

The comprehensive product range extends from single cables and components to complete end-to-end systems. The modular solutions of Datwyler are suitable for all sizes and types of Local Area Networks (LANs), comms rooms and data centres.

COPPER CABLING SYSTEM

The Datwyler product portfolio includes shielded and unshielded copper technology system solutions for the transmission of analog and digital voice, image, multimedia and data signals as well as control signals and remote power (PoE to 4PPoE).

On the following pages you will find our recommendations for copper data networks with transmission speeds of 1 Gbit/s, 10 Gbit/s and more – i.e. for all your applications in office environments and data centres. Here you can also basically choose between especially future-proof “high-end” and “premium” solutions as well as cables and components which are very popular with our customers due to their cost-effectiveness or optimum price-performance ratio.

The demands on cabling systems continue to grow at a rapid pace. A shielded 10 Gbit/s copper solution from Datwyler brings such high performance to your office environment that it also equips your network infrastructure for future technologies (from page 18 onwards). These days it is vital to plan well ahead in a data centre environment as well, in order to be prepared for further technological advances (from page 69 onwards).

SHIELDED VS. UNSHIELDED

The higher the demands on data infrastructure, the greater the influence from the surrounding systems. As part of the ISO standard, new specifications have been established for coupling damping and Alien Cross Talk. These parameters demand an error-free 1GBase-T and 10GBase-T application.

An independent analysis within a third party laboratory has highlighted the problem from outside influence. A simple mobile phone within the area of a 1GBase-T application can create interference on a 1GBase-T unshielded application.

Datwyler therefore recommends shielded Channel solutions for guaranteed performance on a secure network.

DATWYLER CABLES
+ **DATWYLER COMPONENTS**
+ **QUALITY ENGINEERING**
= **25-YEAR SYSTEM WARRANTY**

The sophisticated Datwyler training and certification programme for Solution Partners guarantees the optimal installation quality of our products. Certified partners can offer a Datwyler warranty for the installed systems: normally for 25 years, but this can be extended depending on project criteria.

DATWYLER LINK RECOMMENDATIONS

High-End Link: greatest headroom, PoE++/4PPoE, future-proof

Highest bandwidth reserve capacities and power transmission to the workplace over the LAN cabling system - up to 96 W for end devices such as computers, monitors, cameras and telephones.

Premium Link: good headroom, PoE++/4PPoE, future-proof

High bandwidth reserve capacities and power transmission to the workplace over the LAN cabling system - up to 96 W for end devices such as computers, monitors, cameras and telephones.

Most Economical Link

COPPER SOLUTIONS - 25/40 Gbit/s STP

DATA CABLE - CATEGORY 8

Copper data cables, up to 2000 MHz, 4 x 2 x AWG23, for data centre and structured premises cabling.
Applicable standards: EN 50173-1:2002, ISO/IEC 11801:2002/A2:2010.
Application up to 40GBase-T, reserves for future applications.
Developed for 40GBase-T and a transmission distance of 30 m.
Optimized for broadband video signals, e.g. analogue and digital TV signals.
PoE+ and PoE++/4PPoE-ready (max. 100 W).
Particularly suitable for Class I and Class II networks.

S/FTP

CU 8203 4P, S/FTP, AWG 23, shielded

DATA CABLE - 25 GBIT/S

Copper data cable, up to 2000 MHz, 4 x 2 x AWG22, for data centre and structured premises cabling.
Applicable standards: EN 50173-1:2002, ISO/IEC 11801:2002/A2:2010.
Application up to 25GBase-T, reserves for future applications.
Developed for 25GBase-T and a transmission distance of 50 m.
Optimized for broadband video signals, e.g. analogue and digital TV signals.
PoE+ and PoE++/4PPoE-ready (max. 100 W).

S/FTP

The "D" in these article numbers stands for Euroclass D_{ca}. For higher fire performance requirements, Datwyler offers these cables also with Class C_{ca} or even B2_{ca} performance.
For the available Euroclasses please refer to the online data sheets on www.cabling.datwyler.com.

¹⁾ FRNC/LS0H = Flame Retardant Non Corrosive/Low Smoke Zero Halogen

MODULES

KS-T8 Class I, tool-less, shielded

RJ45 Keystone module.
Developed for 25/40GBase-T.

KS-T8 Class I, toolless

Article No.	Description	Colour	PU
440071	RJ45 module KS-T8 Class I, tool-less, shielded, with dust shutter (grey)	metal	12 pcs.

PS-GG45 and PS-TERA, Cat.7_A, shielded

Speziell für Anwendungen über 10GBase-T hinaus entwickelt.
PS-GG45: das „Two-in-One“-Modul hat 12 Kontakte, die in zwei verschiedenen Übertragungsmodi genutzt werden können: Standard = RJ45 und High-Speed = GG45.
PS-TERA™: für PS-TERA-Patchkabel.

PS-GG45 7_A, Cat. 7_A

PS-TERA 4P, Cat. 7_A

Article No.	Description	Colour	PU
400102	Module PS-GG45 7 _A , 1000 MHz, 4P Two-in-One, shielded	metal	10 pcs.
400103	Module PS-GG45 7 _A , 1000 MHz, 4P Two-in-One, shielded, for stranded wires	metal	10 pcs.
1408502	Module PS-TERA 4P, Cat.7 _A /F _{UTP} , 1000 MHz, shielded	black	1 pc.

PATCH CORDS

RJ45, 2000 MHz, shielded, wiring 1:1

with CU 8206 4P flex, Cat. 8
suitable for 25GBase-T and 40GBase-T transmission

Article No.	Patch cord	Cable	Cable colour	Wiring
available lengths on request	RJ45 patch cord, 2000 MHz	FRNC/LS0H	grey	1:1

GG45™ Connecting System

Measurement / Patch cord GG45 7_A, 1000 MHz, 4P, shielded
Adapter patch cord PS-GG45 / RJ45, 4P, shielded

The measurement cords PS-GG45 7_A, 1000 MHz, 4P, are primarily needed for acceptance measurements.
The PS-GG45 plugs are not backward compatible with RJ45 jacks.
The combination of a high-performance PS-GG45 cabling system with RJ45 active devices can only be achieved with adapter patch cords (PS-GG45 to RJ45).

Measurement / patch cord

PS-TERA 4P/2P to RJ45 with flex cable CU 7702 flex

Recommended especially for multimedia cabling.
Cable type: CU 7702 flex 4P (PiMF), FRNC/LS0H, up to 1000 MHz, shielded.
Applicable standards: ISO/IEC 11801 2nd Ed. Amd.2 EN 50173: 2007.
For Class F_A/ Cat. 7_A both ends of the patchcord are wired up with a PS-TERA 4P plug.

COPPER SOLUTIONS - 1 Gbit/s UTP

DATA CABLE - CATEGORY 6

Copper data cable, up to 300 MHz,
for structured premises cabling.
Applicable standards: EN 50173-1:2002,
ISO/IEC 11801:2002/A2:2010.
Applicable up to 1000Base-T.

The "E" in these article numbers stands for Euroclass E_{ca}. For higher fire performance requirements, Datwyler offers these cables also with Class D_{ca}, C_{ca} or even B2_{ca} performance.
For the available Euroclasses please refer to the online data sheets on www.cabling.datwyler.com.

¹⁾ FRNC/LSOH = Flame Retardant Non Corrosive/Low Smoke Zero Halogen

DATA CABLE - CATEGORY 5e

Copper data cable, up to 100 MHz, 4 x 2 x AWG24,
for structured premises cabling.
Applicable from ISDN to 1000Base-T.
Applicable standards: EN 50173-1:2002,
ISO/IEC 11801:2002/A2:2010 .

COPPER SOLUTIONS

Pre-assembled trunk cables

COPPER TRUNKS

Connectors & cable types

Pre-assembled trunk cables are fabricated using high-performance cable products which are supplied in combination with different performance levels of modules and connectors.

The products are delivered in the lengths requested by the customer and have already been tested and certified in accordance with the latest standards.

This provides installers and operators, particularly in data centers, with products which make it possible to install even extensive copper-based systems to the highest quality in a very short time.

Tailor-made pre-terminated copper trunk assemblies, in the requested lengths, with customized imprints on the single cables, with the requested modules or plugs, 100% pre-tested, with measurement reports!

Modules and plugs for trunks

type	application	construction	compatible with cable
Category 6_A modules / Class E_A			
RJ45 module KS-TC Plus 1/8 Cat. 6 _A (IEC)	up to 10GBase-T	shielded	flex / solid
RJ45 module KS-T Plus 1/8 Cat. 6 _A (IEC)	up to 10GBase-T	shielded	flex / solid
Category 6/6_A plugs / Class E_A			
RJ45 plug 4P Cat. 6 _A	up to 10GBase-T	shielded	flex
RJ45 plug 4P Cat. 6	up to 10GBase-T	shielded	flex / solid

Cable types for trunks

type	max. Class	application	Ø [mm]	max. length [m]
Flexible tube/braid cables				
3-fold CU 7702 3x4P flex	F	min. 10GBase-T	12	60
6-fold CU 7702 6x4P flex	F	min. 10GBase-T	20	60
8-fold CU 7702 8x4P flex	F	min. 10GBase-T	22	60
12-fold CU 7702 12x4P flex	F	min. 10GBase-T	27	60
16-fold CU 7702 16x4P flex	F	min. 10GBase-T	32	60

Length determination & design of pre-assembled copper trunks

Dimensions

Flexible cable 12-fold
CU 7702 12x4P flex

Solid cable 6-fold
CU 7002 6x4P

Flexible cable 6-fold
CU 7702 6x4P flex

Length definition

The following criteria are decisive for all pre-assembled Datwyler copper trunks:

- L** = Length between dividers / fixing points
(= purchase order length)
- A** = Type of assembly side A:
as required / depending on application,
legs graded in length or of equal length
- B** = Type of assembly side B:
as required / depending on application,
legs graded in length or of equal length

COPPER SOLUTIONS

Consolidation Point and Floor box inserts

CONSOLIDATION POINT BOXES

CP box for one 24-port front plate

W x H x D: 480 x 55 x 190 mm (with lock: H = 57 mm)

CP box for one 12-port front plate

W x H x D: 260 x 55 x 190 mm (with lock: H = 57 mm)

CP box for one 6-port front plate

W x H x D: 156 x 55 x 190 mm (with lock: H = 57 mm)

Application

For the termination of data cables in a Consolidation Point (CP), typically installed in raised floors.

Suitable for the following Datwyler Keystone modules:

PS-GG45 7_A 4P,
KS-TC Plus, KU-TC Plus, KS-T Plus 1/8, KS-TS 1/8,
KU-T 1/8, KS-T 5 1/8

Article No.	Description	Material	PU
417489	Consolidation Point box, 24 ports (delivery without front plate)	steel sheet, galvanized	1 pc.
417490	Front plate FP 24x MGK for 24-port CP box	steel sheet, galvanized	1 pc.
417483	Consolidation Point box, 12-port (delivery without front plate)	steel sheet, galvanized	1 pc.
417484	Front plate FP 12x MGK for CP box 12-port	steel sheet, galvanized	1 pc.
417487	Consolidation Point box 6-port (delivery without front plate)	steel sheet, galvanized	1 pc.
417488	Front plate FP 6x MGK for CP box 6-port	steel sheet, galvanized	1 pc.
417485	Lock for Consolidation Point box, keyed alike	steel sheet, galvanized	1 pc.

FLOOR BOX INSERTS

Floor box inserts Economy

for Keystone modules MS-K, GG45, KS-T, KU-T

Description

Floor box inserts Economy for Keystone modules. Modules can be clipped into the cut-outs directly (without additional adapter plates). Cut-out (port) dimensions: 14.8 x 19.3 mm.

Suitable for the following Datwyler Keystone modules:

PS-GG45 7_A 4P,
KS-TC Plus, KU-TC Plus, KS-T Plus 1/8, KS-TS 1/8, MS-K Plus,
KU-T 1/8, KS-T 5 1/8

Article No.	Description	PU
418400	Floor box insert Economy for OBO-Ackermann GES6, for 2x 3 Keystone modules	1 pc.
418401	Floor box insert Economy for OBO-Ackermann GES9, for 3x 3 Keystone modules	1 pc.
418402	Floor box insert Economy for Electraplan, for 2x 3 Keystone modules	1 pc.
418403	Floor box insert Economy for Electraplan, for 3x 3 Keystone modules	1 pc.
418404	Floor box insert Economy for PUK, for 3x 3 Keystone modules	1 pc.
1409559	Blank plate for unused Keystone cut-out (port)	1 pc.

ACCESSORIES

RJ45 couplers, shielded

Application

Suitable for setting up Consolidation Points and Cross-Connect wirings.
For the transmission of all digital and analogue applications up to Cat.6_A/Class E_A.
Angled or straight.

MS-KS, 90° angled:
MS port (left side),
Keystone port (right side)

Keystone, 180° straight:
Keystone ports on both sides

Field assembly plugs, IP20

Cat.6_A, angled or straight

RJ45 plug IP20, Cat. 6_A,
shielded, 180° straight,
for field assembly

Article No.	Description	Colour/material	PU
417445	RJ45 coupler, MS-KS, Class E _A , shielded, 90° angled	metal	1 pc.
417446	RJ45 coupler, MS-KS, Class E _A , shielded, 180° straight	metal	1 pc.
418056	RJ45 coupler, Keystone, Class E _A , shielded, 180° straight	metal	1 pc.
418078	RJ45 plug, IP20, Cat.6 _A , shielded, 90° angled, for field assembly	metall	1 pc.
417523	RJ45 plug, IP20, Cat.6 _A , shielded, 180° straight, for field assembly	metall	1 pc.

Rail adapters

FIBRE OPTIC SOLUTIONS

Conclusive fibre optic systems

Datwyler, as an experienced and innovative cable manufacturer, supplies complete fibre optic cabling solutions - including services and support in the areas of consultation, planning, engineering, design, development, training, installation and documentation, if requested.

Datwyler has a comprehensive offering of fibre optic cables and components for high-density, high-speed data network solutions.

Our solutions are designed, overall and in detail, to fully meet the demands of the future. They are adapted to meet customer's needs and ensure a network infrastructure that will support future applications for a long time to come.

PREMISES NETWORKS

Horizontal (Desk)

The horizontal serves the desk or application workspace

Riser

The riser joins together equipment in a floor-level telecommunications closet and upper floor closets or zones.

Data Centre

The data centre is a facility dedicated to data-intensive applications, where racks of interconnected equipment manage large amounts of information.

Backbone (Campus)

The backbone is typically the longest run in a premises network, often interbuilding.

Application spaces

From a communications pathway perspective, premises networks consist of four primary sections:

Backbone (Campus)	OS2, OM3, OM4
Data Centre	OS2, OM4, OM5
Riser	OS2, OM3, OM4
Horizontal (Desk)	OM3, OM4

The premises network outlined on the right side, or portions thereof, may also be called a local area network (LAN) or enterprise network.

Top 5 design considerations

- Link length
- Application
- Future performance
- Power budget
- Environmental requirements

Two major fibre classifications

The two major classifications of optical fibre are single-mode and multimode.

SINGLE-MODE FIBRE

Single-mode fibres are best suited for longer distance applications (>1 km). Single-mode fibre is designed to carry only one mode of light, and thus does not experience modal dispersion like multimode fibre.

Single-mode E9/125

Optical single-mode fibre cable transmission performance parameters

Classification	Optical fibre type and cable type	Wavelength [nm]	Modenfeld-Durchmesser [nm]	Cladding diameter [nm]	Coating diameter [nm]	Typical attenuation wired [db/km]	Maximum attenuation wired [db/km]
ITU-T G.652.D	Singlemode E9/125 OS2	1310	9.2 +/- 0.4	125 +/- 0.7	242 +/- 5	0.34	0.4
		1550	10.4 +/- 0.5			0.21	0.3
		1625				0.23	0.3
ITU-T G.652.D / ITU-T G.657.A1	Singlemode E9/125 OS2	1310	9.2 +/- 0.4	125 +/- 0.7	242 +/- 5	0.34	0.4
		1550	10.4 +/- 0.5			0.21	0.3
		1625				0.23	0.3
ITU-T G.657.A2	Singlemode E9/125 OS2	1310	8.6 +/- 0.4	125 +/- 0.7	242 +/- 5	0.36	0.4
		1550	9.6 +/- 0.5			0.22	0.3
		1625				0.25	0.32

The fibre designation (OS2) corresponds to the designation of ISO/IEC 11801 or EN 50173. OS2 is commonly referred to as "low water peak" single-mode fibre and is characterized by having a low attenuation coefficient in the vicinity of 1383 nm.

MULTIMODE FIBRE

Multimode fibres are suitable for premises applications where the links are a few hundred meters long and there are many connectors. The larger core diameter of multimode fibre allows the use of affordable 850 nm transmitter diodes as well as low-cost connectors. Multimode fibre uses a graded index profile to minimize modal dispersion. This design maximizes bandwidth while maintaining large cores for simplified system assembly and lower network costs. For multimode fibres, bandwidth is the major limiting factor in network design.

Multimode G50/125

Optical multimode fibre cable transmission performance parameters

Classification	Optical fibre type and cable type	Speed	Wavelength [nm]	Attenuation typical (cabled) [db/km]	Attenuation maximum (cabled) [db/km]	OFL bandwidth as per TIA/EIA 455-204 and IEC 60793-1-41 [MHz x km]	High-Performance EMB bandwidth as per TIA/EIA 455-220A and IEC 60793-1-49 [MHz x km]
ISO/IEC 11801/EN 50173 TIA 492AAAC OM3 bend optimized 850 nm laser-optimised	Multimode 50/125 µm	≥ 10 Gb/s	850 1300	2.5 0.5	2.7 0.7	1500 500	≥ 2000 n/a
ISO/IEC 11801/EN 50173 TIA 492AAD OM4 bend optimized 850 nm laser-optimised	Multimode 50/125 µm	≥ 10 Gb/s	850 1300	2.5 0.5	2.7 0.7	3500 500	≥ 4700 n/a
ISO/IEC 11801/EN 50173 TIA 492AAE OM5 bend optimized 850 nm laser-optimised	Multimode 50/125 µm	≥ 10 Gb/s	850 953 1300	2.5 1.8 0.6	2.7 1.8 1.0	3500 1850 500	≥ 4700 ≥ 2470 n/a

The fibre designation (OM3 up to OM5) corresponds to the designation of ISO/IEC 11801 or EN 50173. Laser-optimised fibres are defined by their Effective Modal Bandwidth (minEMB, 850 nm VCSEL laser).

Multimode fibre link lengths and data rates

Although fibre bandwidth is a critical factor in determining link length and data rate, it is not the only one. Transmitter and receiver characteristics are as important as fibre bandwidth in determining supportable link lengths at specified data rates. At high data rates (40/100 Gbit/s) also the attenuation of the connectors limit the link length.

Bend optimized multimode fibres (G50/125)

With higher bit-rate transmissions (≥ 10 Gbit/s) the attenuation budgets are constantly decreasing. Thus, one has to focus on high-grade products when selecting the fibre optic components. The optical fibres should provide an enhanced transmission reliability and reduce the risks of additional losses that may arise as a result of typical faulty use and of mechanical stress. This is the reason why Datwyler use the bend optimized G50/125 fibre for OM3 up to OM5 fibre categories: In case that the minimum bending radius is undercut, this leads not necessarily to failure of a connection. However, too small bending radii should be avoided to extend the lifetime of fibre optic cables (and optical fibres). The bend optimized G50/125 fibres are fully compatible with "traditional" G50/125 fibres as described in the standard.

FO patch panel OV-E, 19"/1U, loaded

Splice box with shelf for excess tube lengths below the drawer

For the termination of fibre optic cables - maximum of 48 fibres.
Loaded with FO adapters, ready for splicing, with prepared pigtails (per 2 m, colour code: IEC 60304).
Telescopic, folding drawer with stop.
Shelf for excess tube lengths below the drawer.
Cable mounting plate at the rear.
Splice cassettes are hinged, can be easily folded up.

Splice box OV-E, 19"/1U, extractable
configuration example with 12 LC Duplex adapters APC and 24 pigtails

FIBRE OPTIC SOLUTIONS

Patch panels

FO patch panel OV-S, 19"/1U, loaded Splice box with adapters and pigtails

For the termination of fibre optic cables - maximum of 96 fibres.
Drawer extractable.
Front panel numbered.
Loaded with FO adapters, ready for splicing, with prepared pigtails
(per 2 m, colour code: IEC 60304).

Splice box OV-S, 19"/1U, extractable,
configuration example with 24 LCD/APC adapters
and 48 pigtails

19"/1U splice box, E9/125 G.652.D, OS2

FIBRE OPTIC SOLUTIONS

Connector termination

Connector termination: optical performance values

Datwyler offers a broad range of terminated connectors for individual customer needs. These can be supplied in Simplex as well as in Duplex variants. Most types are available as APC/HRL variants, too. We are also able to deliver terminations for higher optical performance requirements.

Ferrule material:	zyrconia
Lifetime:	MPO: polymer 1000 connections with stable attenuation values
Test conditions IL:	IEC 61300-3-4
Test conditions RL:	IEC 61300-3-6
Reproducibility of the IL value:	during the whole lifetime a maximum of +/- 0.1 dB
Operating temperature:	-10° C up to +60° C

Connector	IL [dB] typical	IL [dB] maximum	RL [dB] typical	RL [dB] minimum	Grade (IEC 61755)
MM	0.15	0.3	35	30	better than Bm2m
SM	0.12	0.25	55	50	better than B2
SM/APC	0.12	0.25	70	65	better than B1
MTP®/MPO MM	0.15	0.3	25	20	better than Bm2m
MTP®/MPO SM	0.1	0.25	65	60	better than C1

All connectors are tested with our Simplex, Duplex and Mini Zipcord cables as well as our pigtails.

Please note
Our single fibre cables and the connectors of our Duplex patch cables are marked with cable clips “A” and “B”.

There is a single Duplex clip enclosed to enable a change of polarity.

Wiring of a FO Duplex patch cable A to B

MTP® is a registered brand name of US Conec.

FIBRE-OPTIC TRUNKS

Pre-assembly of loose-tube cables with all current FO connector types

Trunk termination

Up to 48 fibres, with all current FO connectors.

After the divider (screwable) each single fibre

is protected by aramide yarn and has its own sheath.

Single fibre termination graded in length (max. 2 m after divider).

Comes in crush-resistant hose (IP67), optional with braided sleeving only.

Delivery with optical attenuation measurement report (with OTDR: optional at an extra charge).

Trunk termination (article numbers are valid for both sides)

Pre-assembly of breakout cables with all current FO connector types

Breakout assembly

Termination of up to 24 single-fibre cables, with all current FO connectors.

Single fibre termination optionally graded in length.

Delivery with optical attenuation measurement report.

Comes in braided sleeving (optional at an extra charge: with cable gland and/or crush-resistant hose protection).

Breakout assembly

Breakout assembly	Connector type	Number of connectors	Multimode fibre Article No.	Single-mode fibre Article No.
on one cable end	SC	4	1410596	415023
on one cable end	SC	8	1410597	415024
on one cable end	SC	12	1410598	415025
on one cable end	SC	24	415083	415081
on one cable end	LC	4	415085	415090
on one cable end	LC	8	415086	415091
on one cable end	LC	12	415087	415092
on one cable end	LC	24	415088	415093

Attention: please order the breakout cable separately - according to your individual needs.

When ordering a trunk cable please ensure that the specified length of the trunk cable is defined by the length of the longest single-fibre cable. This means: the total length of the trunk cable is the length of the cable between the two splits plus the additional length of the longest single-fibre cable on both sides.

FIBRE OPTIC SOLUTIONS

Pre-assembled trunk cables

FLEXIBLE TRUNKS

Length determination & design of pre-assembled FO trunks

Description

A Datwyler FO flexible trunk consists of up to 24 single fibre cables (per 2.0 mm) that are combined in a sturdy HDPE braided hose and have pre-assembled connectors on both ends. FO flexible trunks come in customized lengths and gradations. This solution is suitable especially for data centre cabling, rack-to-rack connections and multiple patch links. Delivery with optical attenuation measurement report.

Length definition

The following criteria are decisive for all pre-assembled Datwyler FO trunks:

- L** = Length between dividers / fixing points
(= purchase order length)
- A** = Type of assembly side A:
as required / depending on application,
legs graded in length or of equal length
- B** = Type of assembly side B:
as required / depending on application,
legs graded in length or of equal length

IN-HOUSE CABLING

Building entry point (BEP)

DATpoint TWO - IR, BEP = Building Entry Point

A modular big all-rounder as a pre-assembled kit, ready for use. Ideal for access, in-house and floor distribution. Available in different sizes, depending on the number of fibres. SE trays with optional GPON/splitter holder (70 x 20 x 6 mm).

FIBRE OPTIC SOLUTIONS

Broadband Networks

Tube systems

Micro ducts

Micro ducts are used for the mechanical protection of fibre optic micro cables.

For direct burial or for the laying in pipe systems.

The micro ducts are made from high density polyethylene (HDPE) or low smoke halogen free (LSHF).

Article No.*	Product	Installation type	Material	PU (drum and m)
3432xx	Micro duct DB 7/4 mm	direct burial	HDPE	6000 m

Micro duct bundles

Micro ducts are used for the mechanical protection of fibre optic micro cables.

For direct burial or for the laying in pipe systems. The micro ducts are made from high density polyethylene (HDPE) or low smoke halogen free (LSHF).

Bundles are available in different variants. We'll be pleased to advise you.

Article No.	Product	Installation type	Material	PU (drum and m)
343208	Multi micro duct HPPE DB 12x7/4 mm, orange	direct burial	HDPE	3500 m
343209	Multi micro duct LSHF DI 12x5/3.5 mm, white	laying in pipes	LSHF	800 m

Other versions on request.

Micro duct accessories

Straight connectors, reduction connectors, end caps, waterproof end caps, gas block connectors, divisible gas blocks, safety clips, rubber protection caps, plastic caps, cutting tools (duct shear, minicutter, stripper), deburring tools, etc. are available on request. We'll be pleased to advise you.

DATWYLER AERIAL SOLUTION

Overhead solution for fibre broadband expansion

With this Aerial Solution, the micro cables are installed in non-metallic UV- and frost-resistant micro-ducts on the existing overhead infrastructure – i.e. on telecommunication masts or power poles. Apart from cost savings and a fast rollout, the advantage of this system is that it uses the same network architecture and the same network elements (BEP, OTO, cables), and can be installed by the same firms which install the conventional overhead power or telecommunications network.

The solution comprises 31 mm-thick multi-ducts suspended from steel tape (total height: 44 mm), 10 mm-thick drop ducts for connecting buildings, a branch-off duct closure, a roof entry, and various clamps, fixing components and the requisite tools.

Datwyler recommends the use of non-metallic, non-armoured and longitudinally watertight "FO Outdoor Micro" and "S-Micro" cables with external diameters of between 2.4 and 8.4 mm. These are available with 12 to 216 fibres as required.

Application

- For a simple and cost-efficient Fibre-to-the-Home (FtTH) rollout in rural areas
- For fibre broadband expansion without the need for time-consuming and expensive groundwork

System components

- Micro-duct bundles for pole mounting – micro ducts: 12x 5/3.5 mm (outer), 1x 14/10 mm (inner)
- Micro-duct 5/3.5 mm, single, for the connection to the building
- Branch-off duct closure, watertight, for the protection of up to 3 branches
- Anchoring clamps (2 versions) to fix bundles and single ducts to end or corner point poles
- Requisite pole fixing brackets
- Suspension clamps (2 versions) to fix bundles and single ducts to middle poles
- Stainless steel tape (and requisite buckle)
- House roof entry kit (heat shrink sealing)
- Stripping, separation, cutting and tensioning tools

THE CENTRAL OFFICE - THE HEART OF FIBRE OPTIC INFRASTRUCTURE

CENTRAL OFFICE (POP)

Optical distribution frames (ODF)

19"/47U passive

In FTTx backbone and distribution networks for passive components.

19"/47U active

In FTTx backbone and distribution networks for active components.
Mobile or stationary deployment.

Project-specific configurations are available on request.

ODF passive

ODF active

Distribution boxes and optical drawers

19" splice boxes or breakout boxes are available in pivoting or telescopic versions, in customized configurations and with all current connector types such as LSH, SC and LCD (in PC or APC variants).

The splice boxes are ready for splicing, with prepared pigtails per 2 m, colour code: IEC 60304.

Pre-assembled fibre optic cables

Pre-assembles FO cables enable customers to work with ready-to-install fibre optic multiple cables (trunks) in the requested lengths and types. The trunks are made to customer specifications under laboratory conditions.

Patch and adapter cables, fibre pigtails

Please find an overview of available patch cables and pigtails as well as all data sheets on our website: www.cabling.datwyler.com / Products. Available connector types: SC, LC, LC/APC, LSH, FC/PC, SC/APC, LSH/APC...

DATWYLER'S FUTURE-PROOF DATA CENTRE CABLING SOLUTIONS – A COMPARISON

HIGH-DENSITY DATA CENTRE SOLUTION (HD-DCS)

The HD-DCS offers users the same quality features as the FO-DCS plus more than twice the port density and even greater flexibility. The housings have integrated cable management, which makes installation and maintenance easier. Port labelling is also simpler and more flexible.

Performance features:

- Extremely compact solution with maximum port density (MTP and LCD)
- Flexible assembly with plug-in modules of different size/port density (6, 12, 24)
- Integrated cable management and labelling system
- Compact patch cables (2 mm) with push-pull tabs
- Patch and breakout cables with CPR classification (up to B2_{ca})

Product details from page 71

DATWYLER DATA CENTRE SOLUTION (FO-DCS)

FO-DCS is a future-proof, preassembled plug-and-go fibre optic solution characterised by high-quality cables and components and a high-precision connector assembly. Its outstanding optical and geometric values make it suitable for all current and future high-speed applications in data centres. Modular components can be combined as required, thus providing users with the ultimate in design flexibility.

Performance features:

- Simple installation with intuitive labelling and easy access from the front
- High quality 3U/7HP plug-in modules
- Connectivity solutions with MTP, LDC and LCQ
- Breakout and splice solutions available
- Simple integration of copper connections

Product details from page 80

HIGH-DENSITY DATA CENTRE SOLUTION

NEW

Datwyler's modular High Density Cabling Solution is characterised by its port density and flexibility

The implementation of IoT and Big Data is expected to lead to a general, steady increase in the traffic of digital data. Large amounts of data are generated every second and have to be processed and transferred to their destination. As a result, our data centers and data networks are growing rapidly.

In order to cope with this growth, companies need connection technology for their active components with very high port densities and flexibility for future requirements.

A Datwyler HD-DCS modular solution offers this network flexibility, a great scalability in the smallest space, saves rack space and enables intelligent connection configurations. HD-DCS is the ideal solution for fiber optic data networks, especially in data centres. HD-DCS modules are particularly suitable for all high-density and high-performance applications with duplex signals. With these modules, a packing density of up to 1,152 fibres per 1U can be achieved (MTP₁₂).

With a Datwyler HD-DCS solution, your data network infrastructure is ready for future growth.

HIGH-DENSITY DATA CENTRE SOLUTION

Patch panels and cassettes

PATCH PANEL

HD-DCS modular panel, 19"/1U to take 4 or 12 HD-DCS plug-in modules

Modular, scalable high-density platform for the data centre environment.
Sturdy stainless steel housing with depth-adjustable cable support plate and front 19"/1U mounting brackets.
Pre-assembled with four slots to take HD-DCS plug-in modules from the front or rear.
Each slot accepts three modules with 6 ports or one module with 12 or 24 ports.

Allows for variable, scalable port densities from 48 up to 96 ports (LCD and MPO/MTP®).
Up to 192 fibres (with LCD) or 1152 fibres (with MTP₁₂) per height unit.

Article No.	Description	Colour (front plate)	Colour	PU
473600	HD-DCS panel, 19" 1U, 4x 12/24-port	black	silver	1 pc.
473601	HD-DCS panel, 19" 1U, 12x 6-port	black	silver	1 pc.
473602	HD-DCS panel, 19" 1U, 6/12/24-port	black	silver	1 pc.

CASSETTES

HD-DCS MTP module, 1x MTP on 6x LCD/PC or LCD/APC OM4 or OS2, for HD-DCS modular panel

Accepts pre-assembled MTP trunk cables.
Suitable for all high-density and high-performance applications with duplex signals, particularly in the data centre environment.
Assembled to a very high quality which guarantees optimum values for optical performance (IL/RL).
Polycarbonate (PC) housing with press-fit cover (sealed).
Insertion into the panel from the front.
The MTP coupler at the rear is routed to the front couplers (6LCD) by way of an internal fanout.
Front couplers with integrated, automatic transparent dust shutters.

A packing density of up to 144 fibres on 1U can be achieved with this module type.

Article No.	Description	Colour	PU
473520	HD-DCS MTP module, 1x MTP on 6x LCD/PC, OM4	black	1 pc.
473522	HD-DCS MTP module, 1x MTP on 6x LCD/PC, OS2	black	1 pc.
473523	HD-DCS MTP module, 1x MTP on 6x LCD/APC, OS2	black	1 pc.

HD-DCS MTP module, 1x MTP Duplex on 12x LCD/PC or LCD/APC OM4 or OS2, for HD-DCS modular panel

Accepts pre-assembled MTP® trunk cables.
Suitable for all high-density and high-performance applications with duplex signals, particularly in the data centre environment.
Assembled to a very high quality which guarantees optimum values for optical performance (IL/RL).
Polycarbonate (PC) housing with press-fit cover (sealed).
Insertion into panel from the front or rear.
The MTP Duplex coupler at the rear is routed to the front couplers (2x 6LCD) by way of internal fanouts.
Front couplers with integrated, automatic transparent dust shutters.

A packing density of up to 96 fibres on 1U can be achieved with this module type.

Article No.	Description	Colour	PU
473500	HD-DCS MTP module, 1x MTP Duplex on 12x LCD/PC, OM4	black	1 pc.
473504	HD-DCS MTP module, 1x MTP Duplex on 12x LCD/PC, OS2	black	1 pc.

HIGH-DENSITY DATA CENTRE SOLUTION

Cassettes

HD-DCS MTP module, 2x MTP Duplex on 24x LCD/PC or LCD/APC OM4 or OS2, for HD-DCS modular panel

Accepts pre-assembled MTP trunk cables.
Suitable for all high-density and high-performance applications with duplex signals, particularly in the data centre environment.
Assembled to a very high quality which guarantees optimum values for optical performance (IL/RL).
Polycarbonate (PC) housing with press-fit cover (sealed).
Insertion into panel from the front or rear.
Two MTP Duplex couplers at the rear are routed to the front couplers (4x 6LCD) by way of internal fanouts.
Front couplers with integrated, automatic transparent dust shutters.

A packing density of up to 192 fibres on 1U can be achieved with this module type.

Article No.	Description	Colour	PU
473501	HD-DCS MTP module, 2x MTP Duplex on 24x LCD/PC, OM4	black	1 pc.

HIGH-DENSITY DATA CENTRE SOLUTION

Cassettes and accessories

HD-DCS BO module, 24x MPO for HD-DCS modular panels, for OM4, OS2

Accepts pre-assembled MTP® trunk cables.
Suitable for all high-density and high-performance applications with parallel optic signals, particularly in the data centre environment.
Polycarbonate (PC) housing with press-fit cover (sealed).
Insertion into panel from the front and back.
Two rear side entries fitted with rubber grommets.
Front couplers with translucent dust plugs.

A packing density of 1,152 fibres (MTP₁₂) on 1U can be achieved with this module type.

Article No.	Description	Colour	PU
473571	HD-DCS BO module, 24x MPO, OM4	black	1 pc.
473575	HD-DCS BO module, 24x MPO, OS2	black	1 pc.

ACCESSORIES

HD-DCS patch cable management set 0U 4 patch cable management elements, detachable label plate

The patch cable management 0U comes in a set of 4 pieces.
Patch cables can be routed easily within the same rack unit of the modular panel.
No additional rack unit needed for patch cable routing.
An appropriate label plate including label cover is part of the set.
The label plate can be fold down during the patching process for additional space.

HD-DCS patch cable management set 0U includes the following preassembled parts:

- 4 cable guides
- 4 label plates
- 4 label plate covers
- 4 paper labels (preprinted)

Application example

HIGH-DENSITY DATA CENTRE SOLUTION

Patch and fanout cables

PATCH AND FANOUT CABLES

HD-DCS Indoor cables, MTP

12-144 fibres, OM4 or OS2

Compact, metal-free cable construction with FR/LSZH cable sheath and 12 to 144 fibres. OM4 or OS2 versions with Euroclass D_{ca} (C_{ca} or B2_{ca} available on request).

Sticker labelling at both cable ends.

Project-specific length of individual cables („legs“): standard 0.55 m, max. 4.0 m.

Leg separation effected with a divider housing.

Individual cables are assembled using MTP® connectors with high-performance 12-fibre Elite® ferrules (MTP₈/MTP₂₄ available on request).

Push-pull tabs included.

Standard connectivity methods: type A or C (other types available on request).

Cables fitted with protective sleeves at both ends.

HIGH-DENSITY DATA CENTRE SOLUTION

Patch and fanout cables

HD-DCS patch cords, LCD Uniboot OM4 or OS2

Round Uniboot patch cables with Intelli-Cross mechanism for fast polarity change.
Compact cable design with FR/LSZH cable sheath (2.1 mm) and 2 fibres.
Available in lengths up to 10 m (other lengths on request).
Connectivity A to A or A to B.
Sticker labelling at both cable ends.
Suitable for all high-performance applications with duplex signals in the data center environment.
Preassembled with LCD Uniboot Intelli-Cross connectors (high-performance) at both ends.
Assembled to a very high quality which guarantees optimum values for optical performance (IL/RL).

HIGH-DENSITY DATA CENTRE SOLUTION

Patch and fanout cables

HD-DCS fanout cables, MTP®-LCD

8 fibres, OM4 or OS2

for splitting 100G into 4x 25G or 40G into 4x 10G

Thin, very flexible fibre-optic fanout cables (round, Ø 2.0 mm) with 8 fibres.
Low fire load due to halogen-free flame-retardant LSZH sheath.
Available in 2.5 m standard length (other lengths on request).
Standard connectivity methods: A or C.
Sticker labelling at both cable ends.
Thin divider housing for single-cable separation ("legs").
The legs with LCD Uniboot (LCDU) plugs are numbered (1-4),
can be ordered graded in length or of equal length.
Project-specific assemblies available on request.
Suitable for all high-performance applications in the data centre environment.
Assembled to a very high quality which guarantees optimum values
for optical performance (IL/RL).

Used to split all well-known multimode and single-mode QSFP applications
such as SR4, PSM4, PLR4 and FCp into four duplex channels;
the connectivity splits one 4-channel parallel optic link into four duplex links
(e.g. 100G to 4x 25G or 40G to 4x 10G).

Article No. type A	Article No. type C	Description	Cable sheath colour	PU

HD-DCS fanout cables, MTP®-LCD

12 fibres, OM4 or OS2

for connecting active components

Thin, very flexible fibre-optic fanout cable (round, Ø 2.0 mm) with 12 fibres.
Low fire load due to halogen-free flame-retardant LSZH sheath.
Available in 2.5 m standard length (other lengths on request).
Standard connectivity methods: A or C.
Sticker labelling at both cable ends.
Thin divider housing for single-cable separation ("legs").
The legs with LCD Uniboot (LCDU) plugs are numbered (1-6),
can be ordered graded in length or of equal length.
Project-specific assemblies available on request.
Suitable for all high-performance applications in the data centre environment.
Assembled to a very high quality which guarantees optimum values
for optical performance (IL/RL).

The connection between six duplex ports and one parallel optic port
enables quick and space-saving cabling of active components such as
routers, switches, servers and storage systems.

DATWYLER DATA CENTRE SOLUTION

The future-proof solution for your data centre cabling

High-performance system solutions in copper, but chiefly in fibre optic technology constitute the backbone of high-speed data transfer in data centres. The ever higher transmission rates not only call for high-quality optical fibres, they also make increasing demands on the connecting components. Both system components are crucial to the efficient performance of transmission channels.

Flexibility is a core requirement for a cabling solution in today's data centre environment. New systems need to be planned, assembled and installed within a very short time. New technologies (like BiDi), new generations of devices (like 25G servers) and new network designs (fabrics) mean that the demands on link performance are continually rising.

Datwyler's Data Centre Solution surpasses all the requirements for modern, powerful cabling solutions, its high quality and excellent optical and geometric connector assembly values being of particular note here.

FUTURE-PROOF CABLING SOLUTION

for data centres

Benefits of the Datwyler Data Centre Solution:

- Top quality guarantees top performance
- High packing densities hand in hand with good clear layout
- Fast and easy assembly (plug-and-go)
- Modifications/installations possible during ongoing operation, no need for outside companies (reduced OPEX)
- Preassembly: no in-situ stripping, splicing or connector termination work necessary
- Slimline cable design, so no disruption to cooling air flow and no redundant lengths of cable in rack
- Scalable thanks to modular design
- Investment protection and future viability as migratable to future applications
- High spare capacity due to extremely low optical losses
- Power budget protection thanks to bend-optimised fibres (multimode)

The most important system components:

- Preassembled fibre optic mini trunks
- Preassembled fibre optic plug-in modules (MTP, Breakout or Splice version)
- Fibre optic fanout cables (100G on 4x 25G, for example)
- Fibre optic patch cables (LCD and MTP)
- Modularly equipped 19-inch 1U panels and 3U/4U subracks
- Patch management trays and cable management accessories

These system components provide high-performance modular solutions for server room and data centre cabling tailored to customer requirements, the outstanding features of which are clear layout, flexibility, high packing density and good handling during operation.

Optical values of the Datwyler Data Centre Solution:

Criterion	Assembly Class	Insertion Loss IL [dB]		Return Loss RL [dB]	
Connector type	IEC 61755-3-2	mean	maximum	mean	minimum
MTP Elite® 0° PC (multimode)	Grade B	0.15	0.3	≥ 40	≥ 35
MTP Elite 8° APC (single-mode)	Grade B	0.1	0.3	≥ 70	≥ 65
LCD Uniboot 0° PC (multimode)	Grade B	0.1	0.25	≥ 40	≥ 35
LCD Uniboot 8° APC (single-mode)	Grade B	0.1	0.25	≥ 75	≥ 65

FIBRE OPTIC CHANNEL CONFIGURATION OPTIONS

The high-performance carefully coordinated cables and components of the Datwyler Data Centre Solution can be combined as required and make it possible to implement an open infrastructure design decoupled from the user's equipment pool. The system also allows simple migration to future applications. The graphics below show some typical configurations. Please see our website for more.

Module-to-module configuration

Two FO-DCS plug-in modules are interconnected by a thin mini breakout cable MTP-MTP. For all known Duplex applications up to 25G Ethernet or up to 32G Fiber Channel.

Part	Level	Description	Remarks
1	High-performance	Mini breakout cable MTP-MTP, type A or type C	12, 24, 48, 72, 96 or 144 fibres
2	High-performance	Plug-in module, 3U/7HP, 24F, 2x MTP on 6x LCQ	24 fibres
3	High-performance	Patch cable LCD-LCD (Uniboot)	Polarity: A to A or A to B

These system components are available in multimode (OM3 or OM4) and single-mode (G.652.D) versions.

MTP® and MTP Elite® are registered brand names of US Conec.

DATWYLER DATA CENTRE SOLUTION

Module-to-module configuration (without MTP)

Two FO-DCS splice plug-in modules are interconnected by a thin FO Universal cable with LCD connectors.
For all known Duplex applications up to 25G Ethernet or 16G Fiber Channel.

Part	Level	Description	Remarks
1	High-performance	FO Universal cable U-DQ(ZN)BH (e.g. with LCD)	12, 24, 48, 72, 96 or 144 fibres
2	High-performance	Breakout plug-in module, 3U/7HP, 6x LCO	Capacity: 24 fibres
3	High-performance	Patch cable LCD-LCD (Uniboot)	Polarity: A to A or A to B

These system components are available in multimode (OM3 or OM4) and single-mode (G.652.D) versions.

Module-to-fanout configuration

One FO-DCS plug-in module is connected to two FO-DCS fanout cables (MTP® on LCD Uniboot) by a thin FO-DCS mini breakout cable MTP-MTP for a direct link between the active ports (e.g. ports of a SAN switch). For all well-known Duplex applications such as 10G and 25G Ethernet or 16G and 32G Fiber Channel.

Part	Level	Description	Remarks
1	High-performance	Mini Breakout cable MTP-MTP, type A or type C	12, 24, 48, 72, 96 or 144 fibres
2	High-performance	Plug-in module, 3U/7HP, 24F, 2x MTP on 6x LCD	24 fibres
3	High-performance	Patch cable LCD-LCD (Uniboot)	Polarity: A to A or A to B
4	High-performance	Front plate, 3U/7HP, 2x MTP adapter, type A	also available with 4x or 8x MTP adapter
5	High-performance	Fanout cable, 1x MTP on 6x LCD Uniboot	Polarity: type A or type C

These system components are available in multimode (OM3 or OM4) and single-mode (G.652.D) versions.

Converter plug-in module configuration

Two FO-DCS converter plug-in modules are interconnected by a FO-DCS mini breakout cable MTP-MTP.
For three 40G, NG100G, PSM4, PLR4 or 64GFC links.

Part	Level	Description	Remarks
1	High-performance	Mini Breakout cable MTP-MTP, type A or type C	12, 24, 48, 72, 96 or 144 fibres
2	High-performance	Converter plug-in module, 3U/7HP, 24F, 2x MTP on 3x MTP	24 fibres (2x 12 on 3x 8 fibres)
3	High-performance	Patch cable MTP-MTP	Polarity: type A, B or C, 12 fibres

These system components are available in multimode (OM4) and single-mode (G.652.D) versions.

Migration to 40G/100G (parallel optics)

The FO-DCS plug-in modules in subracks are replaced by FO-DCS front plates with MTP adapters.
The high-performance FO-DCS mini-breakout cables MTP-MTP can continue to be used.

Part	Level	Description	Remarks
1	High-performance	Mini Breakout cable MTP-MTP type A or type C	12, 24, 48, 72, 96 or 144 fibres
2	High-performance	Front plate 3U/7HP 4x MTP adapter, type A	also available with 2x or 8x MTP adapter
3	High-performance	Patch cable MTP-MTP	Polarity: type A, B or C, 12 fibres
4	High-performance	Y patch cable (1x MTP 24F on 2x MTP 12F)	Polarity: type A, B or C, 24 fibres

MTP® is registered brand name of US Conec.

DATWYLER DATA CENTRE SOLUTION

Subracks and patch panels

SUBRACKS & PATCH PANELS

FO-DCS modular subracks, 19"

Pre-assembled with horizontal guide rails - can be modularly fitted.
Take a maximum of twelve 3U/7HP FO-DCS plug-in modules or front plates.
Capacity: up to 144 Duplex ports (288 fibres) or up to 144 MTP® ports (1728 fibres).
Any mixture of modules / front plates can be installed in the same subrack.
Extractable excess cable length tray (1U) - can be inserted on the fourth rack unit in two ways, so that optionally the slots or holes can be used as cable entry openings.

Kabelzugentlastungen Blind-Frontplatten

Article No.	Description	Material / Colour	PU
470540	FO-DCS modular subrack, 19"/3U, 84HP (without excess cable length tray)	Aluminium, anodised	1 pc.

DATWYLER DATA CENTRE SOLUTION

Patch and fanout cables

PATCH AND FANOUT CABLES

FO-DC Indoor cable MTP®, 12-144 fibres

Sturdy, metal-free indoor cables - provide enhanced crush resistance and rodent protection.
 Compact, metal-free cable construction with FR/LSOH cable sheath.
 12 up to 144 fibres, OM4 or OS2 (G.652.D BLO).
 For Duplex and parallel optic signals.
 Sticker labelling at both cable ends.
 Leg lengths defined on the basis of a specific project (maximum: 4.0 m),
 divider housing for single-cable separation ("legs"), come in protective sleeves.
 Assembled using MTP₁₂ connectors (12-fibre Elite® ferrules) MTP₈/ MTP₂₄ on request.
 Connectivity method: Type A or Type C (other versions on request).
 Comes with test reports on all MTP connectors.

DATWYLER DATA CENTRE SOLUTION

Patch and fanout cables

Pre-assembled fibre optic cable variants

Datwyler also supplies its ready-to-install FO cables in pre-assembled variants such as MTP®-on-LCD, LCD-on-LCD, LCD-on-SCD or tailor-made versions for all projects.

L = Length between dividers / fixing points (= purchase order length)
 A = Type of assembly side A: as required / depending on application;
 legs: graded in length (see example image) or of equal length
 B = Type of assembly side B: as required / depending on application;
 legs: graded in length (see example image) or of equal length

Length of shortest leg:

Length of longest leg:

Maximum leg length:

0.45 m minimum for 1U panel,
 0.75 m minimum for 4U subrack
 $d = c + n \times 8 \text{ cm}$
 4.0 m

FO-DCS fanout cables MTP®-LCD, 8 fibres

For the conversion of 100G to 4x 25G or 40G to 4x 10G

Assembled using 1 MTP connector and 4 LCD Uniboot connectors.
 8 fibres, OM4 or OS2.

For the quick and space-saving connection of active devices
 such as switches, servers, storage, etc.

Legs: can be ordered graded in length or of equal length.

Project-specific assemblies are available on request.

Comes with test reports on all connectors.

Article No. type A	Article No. type C	Description	Sheath colour	Length [m]

440055	Plug-in module for 6x RJ45 module Keystone (without modules)	black	1 pc.

CLEANING TOOLS

The cleanliness of high-quality FO connectors is critical for satisfactory optical performance and long-term trouble-free transmission. Connectors that are dirty, worn or scratched due to improper use will have a negative effect on optical performance because the Insertion Loss (IL) increases whilst the Return Loss (RL) falls.

All FO-related cabling standards point out that professional cleaning tools are necessary to ensure successful acceptance tests and trouble-free patching.

For professional cleaning of FO connectors (e.g. MPO/MTP®) the equipment as featured in Datwyler's FO accessories portfolio is particularly suitable.

Article No.	Fig.	Description	Items cleaned / method	PU

IT RACKS AND ACCESSORIES

Solutions for every requirement

A well-chosen rack or cabinet will not only look good, but will add security, increase the lifespan of your devices and also make it easier to maintain the equipment inside, so saving you money and time.

The Datwyler IT racks are as varied as the requirements of our customers. The range includes Standard and Premium racks as well as wall-mounted racks of various sizes, dimensions and configurations. The racks can be adapted to the intended configuration, the relevant cooling concepts, the cabling and/or your safety requirements.

Our wide range of rack accessories includes fans, lighting, earthing and equipotential bonding sets, PDUs, cable management kits, shelves, faceplates and individual doors to coordinate with the cabinets, as well as a lot more besides.

Type	Server Rack		Network Rack		Wall Mount Rack
	Standard	Premium	Standard	Premium	Premium
Front	Perforated door		Safety glass door		Safety glass door
Back	Perforated door		Sheet steel panel		Sheet steel panel

SERVER RACKS

Server Racks Premium DSRP 19"/42U and 48U

with perforated doors

Application

The Datwyler Server Racks Premium DSRP are heavy-duty cabinets with fully welded frames especially designed for data centres, server rooms and comms rooms. Its load capacity of up to 1500 kg makes it possible to install even heavy equipment within a footprint of a standard rack.

Features

Size:	Height: 42U and 48U Width: 600 mm Depth: 1000 or 1200 mm	Server Rack Premium DSRP, 42U, 600 x 1200 mm
Construction:	Welded sheet steel frame (2.0 mm, partially 1.5 mm)	
Load capacity:	1500 kg, balanced on 19-inch vertical profiles	
19 inch profiles:	2 pairs of 19-inch vertical profiles, 600 mm, front / rear, stepless depth adjustment from inside, with U label	
IP rating:	IP20	
Colour:	RAL 9005 (black), RAL7035 (light grey)	
Front / rear doors:	One-piece perforated doors, 86% perforation, with swivel handle lock, DIN profile, universal key 333, 3-point locking, up to 180° aperture angle; front door can be hinged right or left	
Side panels:	Removable, locks with universal key	
Top panels:	One-piece (D: 1000 mm) or multi-piece (D: 1200 mm), removable, 100 mm round cable entry hole with plastic cover in each corner, 2-4 additional 300 x 100 mm cable entry holes, covered with sheet steel plates	
Bottom panels:	Multi-piece, removable, 100 mm round cable entry hole with plastic cover in each corner, 2-4 additional 300 x 100 mm cable entry holes, covered with sheet steel plates	
Feet:	Set of 4 adjustable feet	
Delivery:	Fully assembled and packed, including installation instructions. Comes with pre-installed flat earthing kit and mounting kits (screws, cage nuts, washers).	
Optional accessories:	2-door sets, plinths, castors, rack baying kits, etc. (see from page 97 or visit www.cabling.datwyler.com)

IT RACKS AND ACCESSORIES

Datwyler offer a wide range of racks and cabinets. Below is a selection from our product range. In order to find the ideal solution for your installation, please contact us. Our local sales office will be pleased to assist you.

WALL-MOUNTED RACKS

Wall-Mount Racks Premium DWMR 19"/ 9U, 12U, 15U and 18U

Application

The Datwyler Wall-Mount Racks DWMR are designed to host patch panels, active components and other data network equipment. They offer an extended access level from all sides thanks to removable (and lockable) side panels.

Wall-Mount Rack Premium DWMR,
9U, 600 x 500 mm

Features

Sizes:	Height: 6U, 9U (491 mm), 12U (624 mm), 15U (758 mm), 18U (891 mm) Width: 600 mm Depth (usable depth): 400 mm (380 mm), 500 mm (480 mm) and 600 mm (580 mm)
Construction:	Welded sheet steel frame (1.25 mm)
Load capacities:	40 kg (D: 500 mm), 30 kg (D: 600 mm)
IP rating:	IP30
Colours:	RAL 7035 (light grey) or RAL 9005 (black)
Front door:	With tinted safety glass and round lock, universal key 333, up to 180° aperture angle, door can be hinged right or left (easy to change)
Rear panel:	Removable, with 150 x 56 mm knock-out panel and pre-punched holes for wall-mount installation (cabinet can also be installed without rear panel)
Standard configuration:	1 pair of adjustable 19-inch vertical profiles with U label, 2 removable side panels, each with universal lock, tinted safety glass door with universal round lock, pre-installed flat earthing kit, 16 pcs. mounting set: screws, cage nuts and washers
Delivery:	Fully assembled and packed, including 2 keys and drilling template
Optionally available:	1 additional pair of adjustable 19-inch profiles (rear), spare key, cable entry panel with brush

More configurations are available on request.

WIRELESS SOLUTIONS FOR HIGH REQUIREMENTS

Mobility has become an integral part of modern day-to-day business. Employees, customers and partners take for granted the existence of wireless access points, and what's more, they are dependent on it. The massive increase of smartphones and tablet PCs in the workplace impressively proves this trend. Forward-looking companies have recognised the signs of the times and responded accordingly. Our future-proof high-density access point solutions are ideally suited for professional use in offices, factory buildings, conference halls, schools, hospitals and hotels.

Bandwidth-hungry applications such as IP television (IPTV), Video on Demand and Voice over WiFi in particular benefit from trouble-free operation with superlative "Quality of experience", even when being simultaneously used by a lot of people and over a large coverage area.

WIFI ARRAYS

Unlike conventional access points, the HD Access Points provide many already integrated devices: from 2 up to 4 radio cells, highly sensitive directional antennas, multi-gigabit switch, controller, firewall, spectrum analyser, and threat sensor.

The advantages of this all-in-one architecture are obvious: less arrays, less cables and less switch ports will result in less investment in communications infrastructure – already in the project implementation period.

Enhance your WiFi performance and network efficiency

Up to 13.88 Gbit/s bandwidth in the 802.11 a/b/g/n/ac (Wave 2) range ensure WiFi coverage of up to 780 users and an area of over 100 x 100 metres.

POWER SUPPLY

There are two ways of supplying power to the HD Access Points: you can use a PoE (Power over Ethernet) adapter or a multi-port PoE switch.

WiFi bandwidth for the future

The XD4 access point with its 4 radio cells and 4x4 Wave 2 (3.47 Gbps) 802.11 ac can be used for demanding indoor applications and as a reliable, robust outdoor solution - also as a part of the existing cabling infrastructure.

Powerful connection

HD Access Points can be connected with fibre optic cables or high-performance copper data cables.

MANAGEMENT

Xirrus Management System (XMS) provides a platform for the centralized management of HD Access Points. Network administrators use it for efficient and centralized configuration, administration and control of Xirrus WLAN networks.

Main functions:

- Web-based user interface
- Network discovery
- Configuration management
- Station assurance
- Network assurance
- Intrusion detection
- Real-time monitoring
- Wireless network mapping
- Drill-down reports
- Safety monitoring and management

On-premise installation

or
Cloud based management

BENEFITS AT A GLANCE

Less WiFi equipment

- up to 13.88 Gbps bandwidth
- higher range and coverage
- up to 780 users per array
- wireless mesh
- access points can be configured
- integrated Gigabit switch
- integrated WiFi controller

Security

- intelligence at the interface
- integrated firewall
- integrated WiFi threat sensor

Professional support

- measurement
- network planning
- checking

Investment protection

- new standards by means of software updates
- switchable between 2.4 and 5 GHz

NETWORK CONTROL

Due to an increasing number of devices and operating systems network designers have to select a solution which makes it easy to connect new devices.

GUESTS

Unknown user + unknown devices

BYOD USERS

Known user + unknown devices

EMPLOYEES

Known user + known devices

IOT DEVICES

No user + known devices

Xirrus EasyPass provides a simple selection of access control solutions for the management, for SSO access of employees and students, for the integration of headless IoT devices and for various types of guest access.

Administrators get detailed information about users and devices which access the network and can use various levels of control without the need of additional operational expenses.

SERVICES

Datwyler complements its services with professional support when measuring a building, designing the network and checking the network installed.

Site Survey

Measurement is carried out with the arrays directly in the building in which WiFi is to be installed.

Simulation

A simulation based on building plans or site maps is carried out to determine the number of HD Access Points required.

Checks

After the installation, the range and coverage is measured and the WiFi network is tested to guarantee the highest possible quality.

MAINTENANCE CONTRACTS

Protect your investment with a maintenance contract. This is the way to keep HD Access Points and software up to date at no extra cost.

Upgrade and updates

Hardware upgrades and software updates ensure that your WiFi HD Access Points will always be fully compliant with the latest standards.

WiFi 6

WiFi 6 (802.11ax) increases the transmission speed, improves the efficiency and minimizes network congestion when using multiple devices.

Overview of the main advantages:

- up to 25% higher data throughput due to QAM 1024 modulation
- multi-user MIMO transmits various data streams to several WLAN clients at the same time
- transmission channels of up to 160 MHz for 4K streaming and VR applications
- OFDMA for bundling of small data packets and optimal utilization of radio cells

WiFi 6 products will soon be available. Please see our website for current product information.

We shall be pleased to advise you and to find the best WiFi solution for you.

LONG-TERM SECURITY

Even the best matched systems can only show their optimal potential when the installation is optimised. With the increased technical demands of class E_A, class F and class F_A links, for example, the demands on the installer are constantly growing.

We train network installers in the Datwyler system solutions in order to be able to guarantee an optimal quality of installation. Our seminars provide participants with the knowledge of the right application for products, combinations and dependencies of different parameters in the cabling system, and the resulting high quality of installation in copper and fibre optic networking.

DATWYLER SYSTEM WARRANTY

Certified installers can offer a Datwyler warranty for the installed copper and fibre optic cabling systems: normally for 25 years, but this can be extended depending on project criteria.

An acceptance test for each link documents that all required electrical or optical values are maintained.

Cabling solutions from Datwyler consistently perform beyond the standards, guaranteeing excess headroom for future application support.

DATWYLER TRAINING

Nowadays simply selling good products and solutions is no longer enough. A high-tech field like ours needs a great deal of know-how.

In our training courses we pass on to you the knowledge and experience we have gained in international standardisation consortia and in collaboration with research and development partners. You can thus provide your own customers with system solutions of the highest level of expertise. The consistently high standard makes us mutually strong and competitive.

You will find individual course types and dates on our home page via the country selection in the "Training" menu.

- 
- . Native speaker as contact person
 - . Representatives in 70 countries
 - . Excellent market knowledge and understanding of market conditions
 - . Familiar with the local variances

ANYWHERE IN THE WORLD: **WE REALIZE YOUR PROJECT**

WE SPEAK
YOUR LANGUAGE
– ALSO FROM A
CULTURAL POINT OF VIEW

You will find us wherever IT infrastructures are involved.

Not only are we fluent speakers of all the major languages, but we're also well versed in the special cultural and application-specific features of each particular country. We are familiar with the rules and requirements and know what is important. This saves our international customers time and money. For they know that Datwyler's development, production and quality control, geared to the specific criteria of the domestic market, give them significant competitive advantages.

And they are sure to feel "at home" if they are then given advice and support in their native language into the bargain.
