The GI Advantage

Tomorrow's Lighting Solutions Today

Based in Sydney, and with offices in every capital city of Australia, Gamma Illumination is a leading commercial and architectural lighting manufacturer. Shaped over the years, Gamma focuses on providing quality products and service to our consumers. We have grown to be leaders in both domestic and international lighting markets through our commitment to innovation, the environment and our consumers.

Our long standing history and reputation, has seen this mission delivered all over the world. Founded in 1986, Gamma Illumination had only a hand full of distributors, a single catalogue and a range of 22 halogen light fittings. Now with over 150 employees, 5,000 lighting products, and an established export market including Europe, China, the Middle East, and Asia, Gamma Illumination is one of Australia's leading commercial and architectural lighting manufacturers.

In 2008 we were a part of a world first, we designed and developed a range of commercial LED luminaires that truly performed. Innovations to LED diode arrays and LED Thermal Management Systems[TMS] saw 'IP Australia' grant one of their first patents for Gamma Illumination's design and development of a commercial LED lighting system.

In 2007, we introduced 'The Gamma Advantage' to ensure that we continue to provide you with innovations that brighten your world. Increased energy and maintenance costs require the need for sustainable solutions made possible by the principles of 'The Gamma Advantage' and our continued research, design and development.

LED Technology

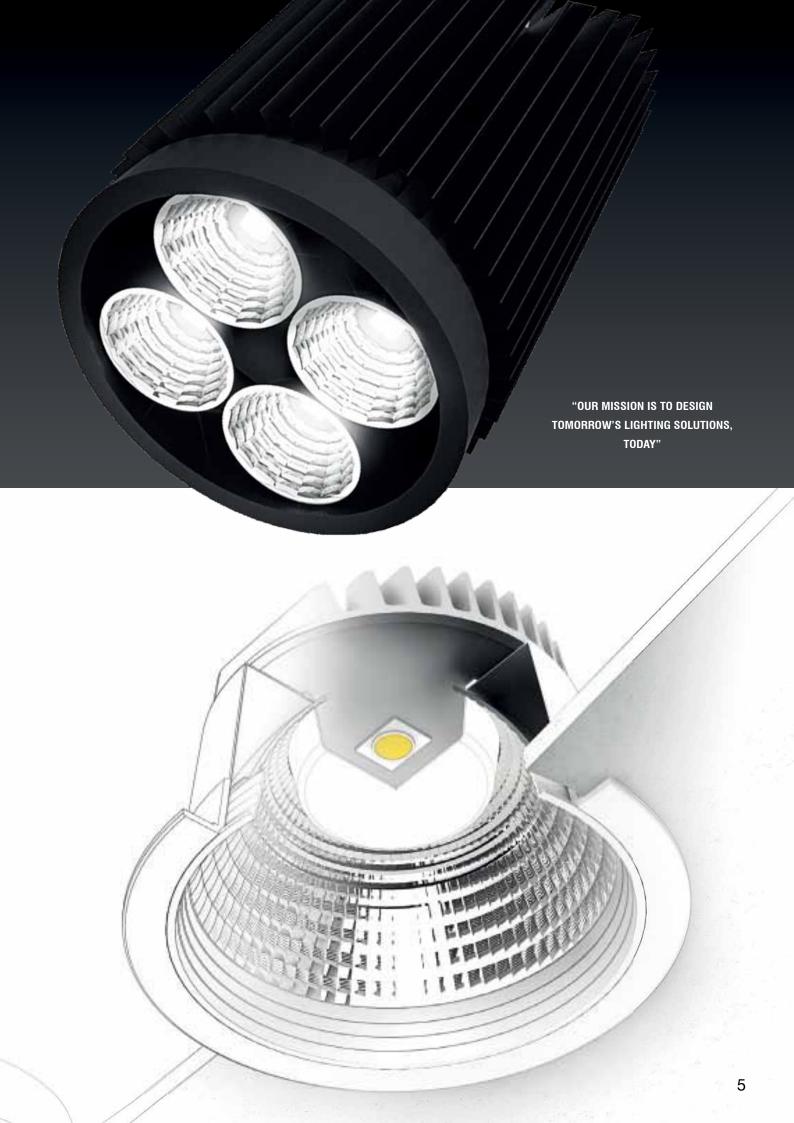

Quality, Reliability & Performance Like No Other

Our in-house development of LED technology has produced a range of LED luminaires that perform to the highest level that we can extract from technology. There are a number of core components that must be of the highest quality to conform to our best practice.

Our LED dies are made in Japan with phosphor coatings that yield long life with no visible colour shift over time. We have standardised on one tight customized colour bin for each colour temperature, so that our luminaires provide an environment with uniform colour. Thermal management design is paramount for LED longevity.

Our in house design and development team perform both thermal simulations and physical tests, ensuring that the design, and materials used meet our strictest in-house thermal management benchmark, all of which exceed relative Australian standards for LED thermal management.

Gamma Illumination's range of LED luminaires best optics designed and developed to suit the light intent of each luminaire that we produce. Gamma's efficient light systems can be credited to our inhouse designed and developed optic systems. Rather than lenses, which in most cases see a loss in the light transmitted through them, we use a reflector system that sees maximum light output and control.

GAMMA ILLUMINATION IS COMMITTED TO INVESTING IN INNOVATIVE

TECHNOLOGIES AND LIGHTING SOLUTIONS THAT

BRIGHTEN YOUR WORLD, OUR ALL NEW PURPOSE-BUILT FACILITY INCLUDES AN IN-HOUSE

LIGHT ENGINEERING TEAM THAT IS RESPONSIBLE

FOR PHOTOMETRIC, ELECTRICAL, THERMAL AND LED TESTING.

Light Engineering and Photometry

Precision Engineered Luminaires For Optimum Performance

PHOTOMETRIC TESTING

Gamma Illumination's light engineering centre houses a photometric facility that is equipped with a 'rotating mirror Goniophotometer'. With the ability to mount the luminaire in its standard mounting position, within a temperature stable space, our photometric testing facility provides the most accurate results, whilst maintaining the most natural conditions for the test luminaire.

Luminaires with a length of up to 1.6m and a weight of up to 50kg can be tested within this facility, made possible by the ample 16m test distance

SPECTROSCOPIC ANALYSIS

We are equipped to perform 'spectroscopic analysis' using our very own 'integrating sphere' and 'Spectroradiometer'. This facility allows us to review the performance of our modules through spectral analysis of our innovative LED technology.

THERMAL TESTING

Our light engineering centre also includes an AS/NZS 60598.1 compliant thermal testing facility. Provisions at this facility have been made to test luminaires at an ambient temperature ≤40°C over extended periods of time.

Research, Design and Development

Innovation, Part Of Every Product and A Big Part Of Our Business

Luminaire and component design is achieved using 3D Design Software and 3D rapid prototyping. This process results in the production of a model for the demonstration and development of components that simulate both mechanical and aesthetic features and functions. Our purpose built R&D centre supports sameday prototyping of both products and electrical components.

Our research, design and development starts with a question, 'how do we solve the problem of '. . .", this leads us to finding innovations through collaborative research and brainstorming. It is

these ideas that create innovative yet meaningful lighting solutions that are problem specific. From here, these ideas become concepts, a number of these concepts are developed, prototyped, simulated and tested. The product that best solves our initial brief/problem then enters product development, if passed, this product is later produced alongside our strictest standards of design, engineering and production. Our research design and development process sees no stone unturned, ensuring every luminaire that leaves our warehouse performs to the highest standard.

Customised LED Spectrums For Specific Applications

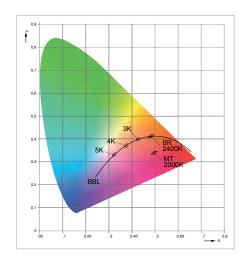

Enhanced Illumination & Presentation

CRI

Gamma Illumination's light engineering centre houses a photometric facility COLOUR RENDERING INDEX is a metric which defines how well colours are rendered by different sources of illumination compared to a defined standard illuminant. There are fourteen special colour rendering indices (Ri where i = 1-14) which define the colour rendering of the light source when used to illuminate standard colours.

The general colour rendering index (Ra) is the average of the first eight special colour rendering indices (which correspond to non-saturated colours).

Products within this catalogue use LED chips with a high R9. Colour Rendering Index, CRI >85 and CRI >75 as indicated on each data sheet. LED modules with CRI >90 are available on request or specification.

DOES NOT EMIT ANY UV OR IR RAYS SO THAT FOOD STAYS FRESH LONGER.

BREAD

For illumination of bread and other bakery goods. Enhances and increases the saturation of browns with a gold tone, whilst maintaining a high level of colour rendering and bright whites.

2400K - Ideal colour temperature for illuminating bread. **CRI 92** - Colour Rendering Index.

MEAT

For illumination of fresh or cooked meat and small goods. Enhances and increases the saturation of reds, whilst maintaining a high level of colour rendering.

2000K - Ideal colour temperature for illuminating meat **CRI 90** - Colour Rendering Index.

Production

Seamless Production Thanks To Our 'Made in Australia' Mark

The Gamma Illumination range of LED luminaires are characterised by efficiency and sustainability, these characteristics are a credit to our mark...

'MADE IN AUSTRALIA'

Manufactured domestically at a quality unsurpassed by none, Gamma Illumination use high quality LED modules and drivers that are designed in-house. Each LED luminaire that leaves our warehouse is proudly marked With thousands of successful and sustainable installations, this mark is proving that our Australian operations are seamless and of high quality. Gamma Illumination has remained a strong manufacturing leader, our newly purpose built facility housing a fully automated SMT line shows that our commitment to quality and our 'Made in Australia' mark is engrained in our every aspect of our business.

Lighting Design

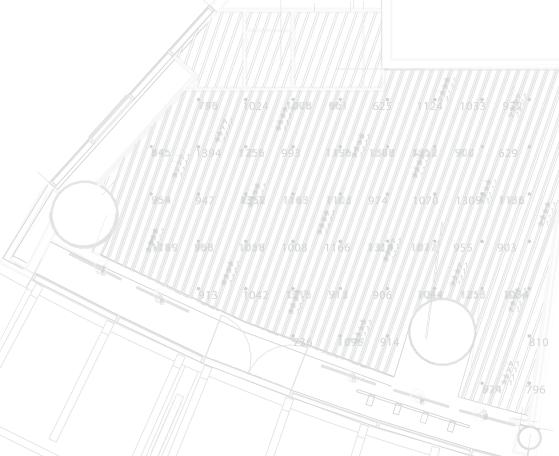

Lighting Solutions Designed Differently For Each And Every Application

Lighting Design is achieved using the world renowned AGI32®, with a decade of in house experience, Gamma can accurately simulate lighting environments and recommend the most suitable products from our range of LED Luminaires. LUX levels can be shown at any point, particularly on both the horizontal and vertical planes. Vertical illumination is very important in retail environments and our lighting designs will show you the Light Density (watts per m²) for compliance to sections of the building code [BCA]. AS1680. IES photometric files are available on our LED range.

IES

A standardised data file which expresses the light output of a luminaire as luminous intensity versus angle. IES files are assigned the file extension ".ies". Used by lighting designers to model the illumination performance of a lighting scheme using commercial lighting design programmes. An IES file is commonly referred to as "photometric data" for a luminaire. IES files are available for each product within this catalogue. Please note: Due to improvement of products IES files are updated regularly to reflect the latest data and in some cases the latest IES file may take a few days to be re-issued.

LEGEND

ALL DIMENSIONS SHOWN IN THIS CATALOGUE ARE IN MILLIMETRES.
LUMINAIRES WITH INTEGRAL DRIVERS ARE WEIGHED (KG) AS A COMPLETE UNIT.

IN COMPLIANCE WITH COLOUR TEMPERATURE (Kelvin = K) **EUROPEAN IEC529 & AUSTRALIAN STANDARD AS1939-1991** 3000 Kelvin = **3K** 4000 Kelvin = **4K** provided with an earth connection 5000 Kelvin = **5K** Class II double insulated - no earth connection **DESCRIPTIONS OF TECHNICAL SYMBOLS (1)** Class III safe extra low voltage supply **F**/ Suitable for mounting on normally flammable surface (D circular hole size for installation Manufactured from materials that will not rust rectangular hole size for installation angle of adjustable tilt ϵ Signifies that a product conforms with the requirements of EEC directives angle of adjustable rotation

ENERGY EFFICIENCY INDEX (EEI)

Gamma LED luminaires contain built-in LED chips and *cannot be replaced*. In some cases, modules can be replaced.

Linear Lightplane System

An unparalleled family of linear profiles, unique geometric forms creates dramatic lighting effects and stunning atmosphere.

The Linear Lightplane system is specially designed with patents technologies as quick lock mechanism, clean-cut magnetic end-caps, 24V LED boards, single driver for multiple lengths, slot-in LED boards no fixing screws, replaceable and upgradeable LED gear trays which makes the whole system unique in marketplace.

The Linear Lightplane system offers abundance choice to designers and engineers to use this system as decorative yet functional.

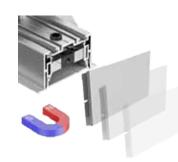

Features & accessories

Gear tray lock

Patent quick lock mechanism. No screws on gear tray. Easy and quick to install. Easy to maintain.

End-caps

Magnetic end-caps without screws. Super slim size, 3mm.

LED board

High efficacy 96lm/W. High CRI 85 to 95. 50mm increment. 2700K, 3000K, 4000K, 5000K and 6000K color temps. Without screws, LED

boards slide-in type.

Bends and brackets

100% lit bends, "L" type, "T" type, "X" type, ceiling to wall, wall to wall, custom bends.

Diffuser

Premium lens with 92% transmittance ratio. Anti UV diffuser. Suitable for the extreme enviroments.

Suspension system

180° adjustability for slanted ceilings.

Strong, safe and light weight. 3m or 4m cable length.

Robust 3mm profile. Light weight, easy to install. High thermal conductive. High-end anodic oxidation treated.

Connectors

Speedy connectors for quick installation.

Power supply

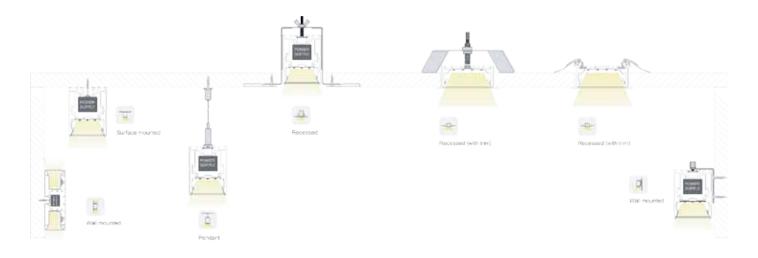

Wide range input 100-277VAC. Full protection with overload short circuit and self-recovery.

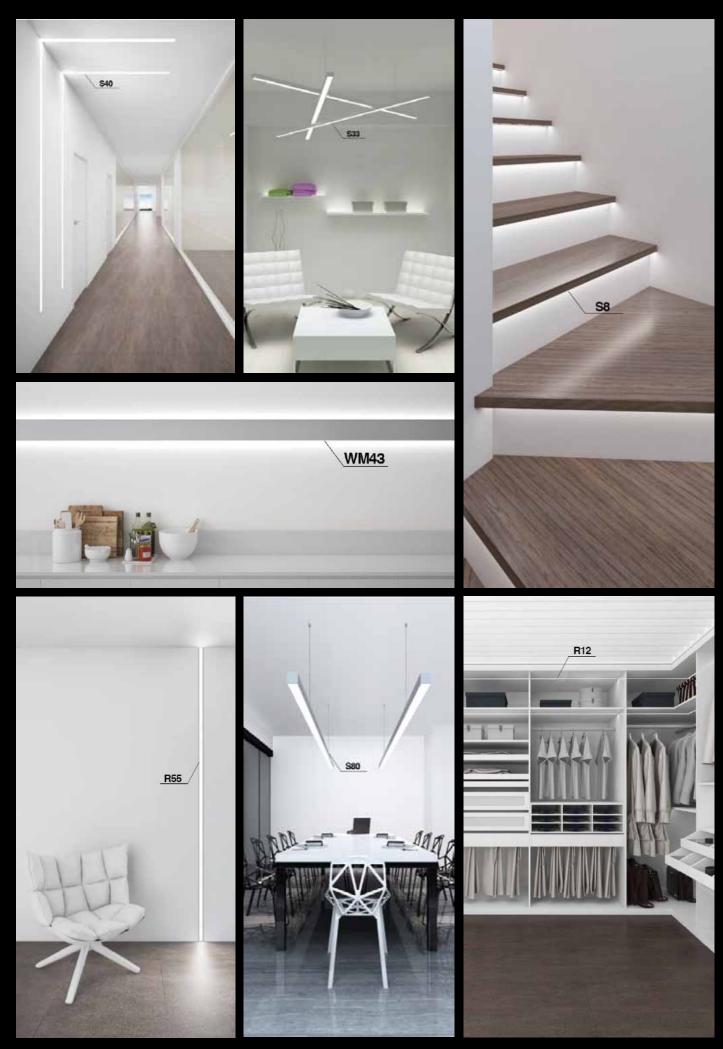

UGR<19

Compliant profiles.

System Overview

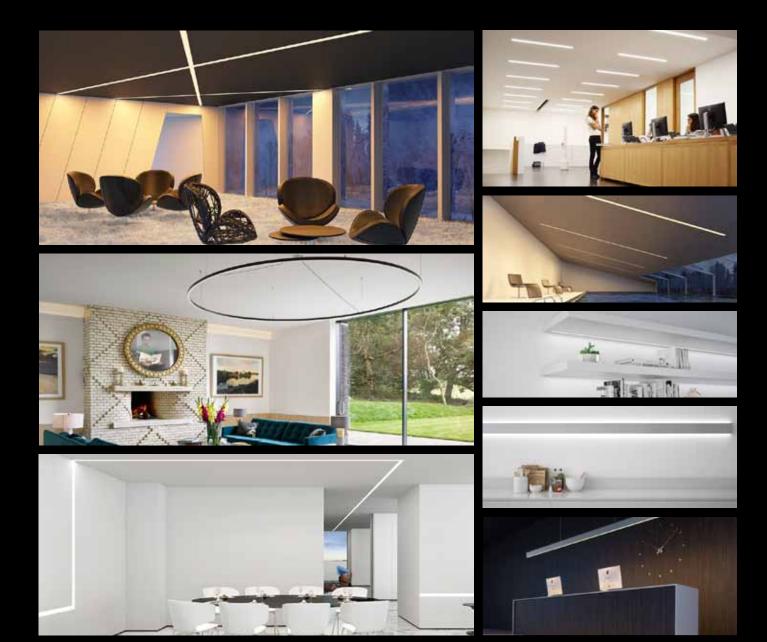

Projects

We are a global supplier of innovative Linear Lighting system and provide amazing solutions to Australia, New Zealand, Malaysia, Indonesia, Qatar, Saudi Arabia, UAE, Bahrain, Pakistan and Oman projects.

Recent projects:

SBS TV, Sydney Emirates Hospital, Dubai Muscat Airport, Oman St Pius college, New Castle Fakhee college, Riyadh Accountability HQ office building, Abu Dhabi Al Emadi hospital, Qatar Jeddah Airport, Saudi Arabia Riyadh Mall shopping centre, Riyadh Stella Marris School, Manly Al Johor residence, Malaysia

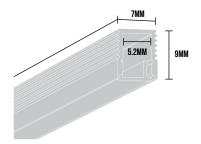

Features:

Surface mount super slim profile width 7mm.

2 step MacAdam ellipse for highest colour consistency.

High quality extruded aluminium profiles.

Frosted lens for uniform and smooth illumination.

Dot free, continuous homogeneous lighting effect.

50mm incremental length, continuous runs.

Remote 24V driver, single driver for multiple lengths, cost effective solution.

Life: 50,000 hours L90/B10.

Easy to install with mounting brackets.

711410	10W	4000K	1000X7X9	800LM/M

Materials

Extruded aluminium profiles with durable UV stabilized

Applications

Joinery lighting, cabinet lighting, display lighting, cove lighting, accent and indirect lighting.

Options

- Dimming: DALI and DSI dimming 1-10V dimming
- CRI 95+
- **Color Temperatures :** 2700K, 3000K, 4000K, 5000K and 6000K
- Individual luminaire or continuous runs
- Customised wattages
- RGB
- Emergency modules
- Clear diffuser

Accessories

Features:

Super slim design with 8mm height.

High CRI 92 with 70 lm/w efficacy.

Seamless continuous run without dark spots.

Dot-free uniform light distribution with frosted lens.

Plug and play system for speedy installation.

power supply. Remote 24V DC driver for ease of

Continuous run of 6 metres from single

Cost effective, easy to install with numerous accessories.

Life: 50,000 hours L90/B10.

installation and maintenance.

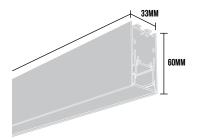

Features:

Sleek modern design aluminium profile with 33mm of width.

Versatile profile suitable for all applications, i.e. recessed, surface mount and suspended.

Provides continuous, dot-free homogeneous light output.

Superior quality components for optimum performance.

Clean-cut magnetic end-caps, no screws.

Seamless joints with speedy connectors.

Plug and play system with factory fitted components for quick installation.

High quality LED modules with CRI 85.

Choice of integral or remote driver.

Incremental length 50mm.

Available with suspension wires, brackets for surface mount and trimless recessed installations.

Life: 50,000 hours L90/B10.

SP126

Materials

100% recyclable, extruded architectural grade T6061 aluminium housing with clear or frosted extruded acrylic lensed body.

Applications

Offices, hospitality, retail, schools, residential and healthcare.

Options

- Dimming: DALI and DSI dimming 1-10V dimming

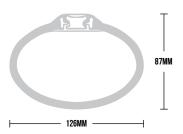

- CRI 95+

- Color Temperatures : 2700K, 3000K, 4000K, 5000K and 6000K

- Individual luminaire or continuous runs

- Customised wattages

- Wall mount and suspension brackets

Features:

Decorative profile with 360° light distribution can be used as supended or wall-scone.

Hollow, illuminated lensed body provides designers a bold new asethtic form, no light source visible.

52% direct and 48% indirect illumination.

Excellent uniformity with smooth lighting distribution.

MacAdam ellipse 2 ensure colour consistency.

Continuous run with 1200mm or 2400mm sections.

Life: 50,000 hours L90/B10.

SP150

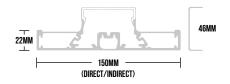

Features:

Sleek suspended profile with 150mm width for direct/indirect lighting distribution.

Provides continuous, dot-free homogeneous light output.

Superior quality components for optimum performance.

2x25W LED board for upward and downward illumination.

Plug and play system with factory fitted components for quick installation.

Integral driver.

Incremental lengths 100mm.

Seamless joints with speedy connectors.

Life: 50,000 hours L90/B10.

Materials

Extruded aluminium profiles with high quality durable UV stabilized

Applications

Offices, hospitality, schools, hospitals, malls, accent lighting, retails, large indoor open areas.

- Dimming: DALI and DSI dimming 1-10V dimming
- CRI 95+
- **Color Temperatures :** 2700K, 3000K, 4000K, 5000K and 6000K
- Individual luminaire or continuous runs
- Customised wattages
- Emergency modules

RI55

Materials

Extruded aluminium profiles with high quality durable UV stabilized

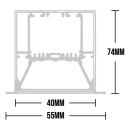

Applications

Offices, hospitality, schools, hospitals, malls, accent lighting, retails, large indoor open areas.

Options

- Dimming: DALI and DSI dimming 1-10V dimming
- CRI 95+
- Color Temperatures : 2700K, 3000K, 4000K, 5000K and 6000K
- Individual luminaire or continuous runs
- Customised wattages
- Emergency modules
- UGR<19 compliant profile

Features:

Sleek modern design aluminium profile with 55mm of width.

UGR <19 compliant profiles as an option for working environment.

Versatile profile suitable for recessed applications.

Provides continuous, dot-free homogeneous light output.

Superior quality components for optimum performance.

Clean-cut magnetic end-caps, no screws.

Seamless joints with speedy connectors.

Plug and play system with factory fitted components for quick installation.

High quality LED modules with CRI 85.

Integral driver.

Incremental length 50mm.

R70

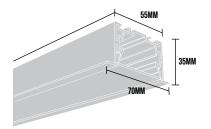

Features:

Sleek modern design aluminium profile with 70mm of width.

Versatile profile suitable for recessed applications.

Provides continuous, dot-free homogeneous light output.

Superior quality components for optimum performance.

Clean-cut magnetic end-caps, no screws.

Seamless joints with speedy connectors.

Plug and play system with factory fitted components for quick installation.

High quality LED modules with CRI 85.

Remote driver.

Incremental length 50mm.

Life: 50,000 hours L90/B10.

CF Strip I

Features:

Super compact flexible LED strip light with SMD3528 and 5050 LED technology.

Available in various wattages and sizes, making it versatile for designers.

Available in IP65 sealed with silicone tube and IP67 with nano technology.

Latest LED's technology from same bin provides hight CRI 95.

Suitable for DC driver of 24V.

Uniform effect throughout the length.

Supplied with self-adhesive tape for easy installation.

Maximum allowed 5mtr length with single driver.

LED strips can be cut at cutting mark to suit various site requirements.

Cost effective, easy to install.

50,000 hours life L70.

Available in IP65 sealed with silicone tube and IP67 with nano technology.

Available in single colours (Red, Green, Blue, Amber) as well.

Suitable for DC driver of 24V.

Uniform effect throughout the length.

Supplied with self-adhesive tape for easy installation.

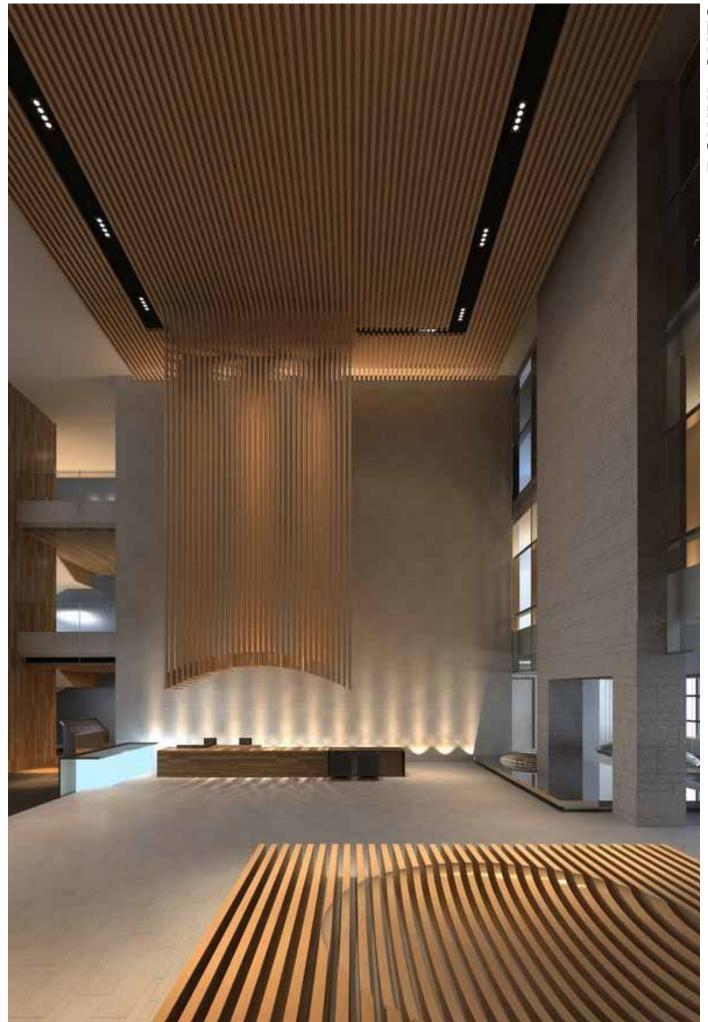

Maximum allowed 5mtr length with single driver.

LED strips compatiable with all DMX controllers.

Cost effective, easy to install.

50,000 hours life L70.

Emus I

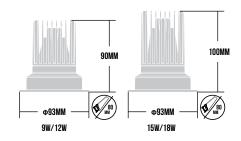

Features:

Round fixed downlight with multiple optical lens.

A wide variety of reflector finishes for seamless appearance.

Standard supplied with mirror reflector and 38° beam angle.

Gold reflector for warmer and richer ambiance or Black-ringo darknight reflector for visual comfort.

Choice of honeycomb louvre for precise and glare-free aiming, woven design glass or striation glass for soft illumination.

Latest generation of LEDs within a 2 step MacAdam ellipse for colour consistency.

COB module, no shadows of multiple LED chips. High colour rendering of Ra>90.

Simple push & lock mechanism for quick tool-free installation of optical lens.

Tools-free system to replace or upgrade LED modules, or to exchange accessories after installation.

IP54 rating makes it suitable for various applications.

Life: 50,000 hours L90/B10.

Features:

Comprehensive range of fixed and adjustable downlights with deep darklight reflector.

Optimum focused illumination, unique design with primary and secondary reflectors.

Advanced shape reflector with 40° cut-of angle for visual comfort.

Designed to comply with UGR<19 for office environments.

Latest generation of LEDs within a 2 step MacAdam ellipse for colour consistency.

High colour rendering of Ra>90.

Adjustable tilt up to 30° for accent lighting.

IP54 rating makes it suitable for various applications.

Pre-wired remote driver with push and lock connectors.

Tools free and easy installation.

Life: 50,000 hours L90/B10.

Features:

Recessed ultra slim LED panel fixture with edge lit technology.

Highly uniform non-glare frosted diffuser for high output lumens.

Laser printed PMMA light guide with 95% reflective film.

Highly efficacy 100lm/W.

Compatiable with various dimming control systems and all false ceiling types.

Optional self contained or central battery emergency lighting versions available on request.

*Standard product suitable for exposed "T" grid ceilings, specify for other ceiling types at ordering.

Plug and play system for quick installation.

Life 50,000 hours L70.

Indi

Features:

Curved anti-glare opal diffuser for indirect light output.

Excellent uniformity with more than 95% LOR. High luminous efficacy.

Durable UV stabilized acrylic soft light diffuser. No light spill from back or sides.

Integral LED driver.

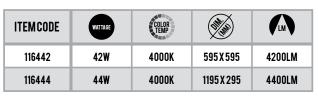

Highly bright uniform light output.

Compatiable with various dimming control systems.

Optional self contained or central battery emergency lighting versions available on request.

*Standard product suitable for exposed "T" grid ceilings, specify for other ceiling types.

50,000 hours life L70.

^{*} Specify for other colour temperatures.

Materials

Sheet steel housing powder coated white. Durable UV stabilized acrylic soft light diffuser.

Applications

Offices, hospitals, schools and large indoor open areas.

- **Dimming:** DALI and DSI dimming 1-10V dimming
- CRI 90+
- **Color Temperatures :** 3000K, 4000K and 5000K
- Emergency back-up

Flexneo I

Flat-FV15

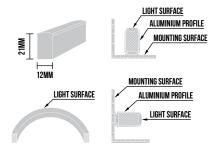

Features:

Slim flexible flat LED neon strip, opal encapsulated with IP68 protection.

Highly resistant to salt water, solvents, UV and flame.

High quality enhanced property polyvinyl material.

Horizontal bending, front view no dark patches.

Flat version creates 160° view angle.

Verstile bending property allows to make smaller bends of 12cm minimum radius.

Minimum cutting length 100mm, maximum single run 10m.

Injection moulded connectors.

Single power supply for 10m runs or 20m from both ends.

Protection rating IP68 - can be used under water upto one metre only.

50,000 hours life L70.

Features:

Slim flexible flat LED neon strip, opal encapsulated with IP68 protection.

Highly resistant to salt water, solvents, UV and flame.

High quality enhanced property polyvinyl material.

Vertical bending, front view no dark patches.

Flat version creates 160° view angle.

Verstile bending property allows to make smaller bends of 30cm minimum radius.

Minimum cutting length 100mm, maximum single run 10m.

Injection moulded connectors.

Single power supply for 10m runs or 20m from both ends.

Protection rating IP68 – can be used under water upto one metre only.

50,000 hours life L70.

ITEMCODE	WATTAGE	COLOR		LM
172310	10 W	3000K	16 X 16	450LM

^{*} Specify for other colour temperatures and RGB.

Materials

SMD5050 tri-chip PCB LED strip as light engine with enhanced PVC ivory white, aluminium channel with self-locking system.

Applications

Cove lighting, border lighting, contour lighting, accent lighting, water feature lighting, entertainment lighting.

- **Dimming:** DALI and DSI dimming 1-10V dimming
- Color Temperatures : 2500K to 5000K, Red, Green, Blue and RGBW
- Silicone housing for harsh atmosphere
- DMX addressable programmes: Chasing, flowing, meteor shower, skipping, flashing, gradual changing, fade-out and fade-in.
- Horizontal bending
- Profiles with L, T, X and curve bends

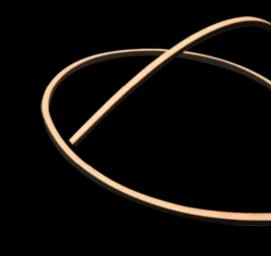

^{*} Accessories to be ordered separately.

Sooty I

Features:

Elegant yet robust 3W, 6W and 11W LED linear marker light.

Continuous linear effect without dark patch.

Factory fitted IP rated male and female cable connectors for continuous run.

Remote single driver can power multiple fittings, cost effective system.

Easy to install, light weight 1.2KG for 1mtr length.

Ultra slim size makes this fixture invisible in building facades and creates stunning effects.

Designed for excellent heat dissipation.

UV stabilised PMMA frosted diffuser.

High quality extruded aluminium channel.

IP65 rated for outdoor applications.

Easy to fix cast aluminium brackets to secure the channel.

50,000 hours life L70.

Easy to fix cast aluminium brackets to secure the channel.

Mag

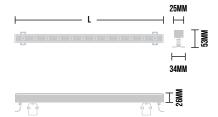

Features:

Slim architectural LED linear projector with static white colour temps.

Latest generation of LED's module with medium, wide, flood and elliptical lens.

Symmetric and asymmetric beam angles.

End-to-end luminaires arrangement provides uniform distribution on surfaces without dark patches.

Plug and play system with male-female connectors.

Low height makes it ideal for building's facade.

Easy and economical to install as longer cable runs possible with 24V system.

Self-cleaning compact flat shape.

Weatherproof protection with IP68 cable glands.

Sealed and gasketed IP66 rated for harsh outdoor environments.

Life: 50,000 hours L90/B10.

Self-cleaning compact flat shape.

Weatherproof protection with IP68 cable glands.

Sealed and gasketed IP66 rated for harsh outdoor environments.

Life: 50,000 hours L90/B10.

Linear Stick

Features:

Modern linear projector with latest technology of tunable white and built-in RGBW decoder.

Adjustable high power LED wall washer 20W, 40W, 60W and 80W. Tunable white 1900K to 6500K.

Special coating versions for harsh conditions such as severe weather, salty marine environment and chemicals surroundings that can easily cause corrosion, rust and eventually failure of LEDs.

Seamless joint, continuous runs without dark patch. Self-cleaning profile, flat slippery surface.

IP65 rated for outdoor applications. Linear length throws bright band of light to illuminate the surfaces without dark patches. Symmetric or asymmetric lens options upon request, suitable for various applications for controlled light projection.

4mm safety glass, stainless steel hardware. IP68 connectors for continuous lengths.

Available in 300mm, 600mm, 900mm and 1200mm length.

Remote driver for 24V DC version, Single power supply for multiple fittings.

Life: 50,000 hours L90/B10.

Materials

Die cast aluminium powder coated paint, 316 stainless steel trim, tempered 5mm thick frosted glass diffuser.

Applications

Indoor and outdoor applications, lighting building, entrances, lobbies, walkways, corridors, ramps and walls.

- Dimming: DALI and DSI dimming 1-10V dimming
- CRI 90+
- Color Temperatures : $3000 \, \text{K},$ 4000K, 5000K, red, green and blue

^{*} Specify SQ for square trim.

^{*} Specify for other colour temperatures and beam angles.

Die cast aluminium powder coated paint, 316 stainless steel trim, tempered 7mm thick glass diffuser.

Applications

Indoor/outdoor applications, lighting building, entrances, lobbies, walkways, corridors, ramps and walls.

Options

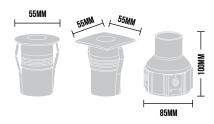

- Dimming: DALI and DSI dimming 1-10V dimming

- CRI 90+

- Color Temperatures : 3000K, 4000K, 5000K, red, green, blue

and RGB

- Honeycomb louvre

Features:

Round/Sqaure recessed inground compact IP67 3W LED uplight.

Wide range of optics from narrow 9° to asymmetric 45°x35°.

316 stainless steel trim for longevity and can withstand harsh weather conditions.

Tempered 7mm thick frosted or clear glass diffuser.

Static load capacity upto 1710kg.

The high intensity of the single power LED in center offers a striking vivid lighting effect.

LED colour output in single or multi colour red, green, blue, white and RGB.

Choice of round and sqaure trim.

Specially designed mounting sleeve and various optional feed cables, glands providing total flexibility and ease at site during installation.

Supplied with PVC sleeve housing.

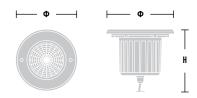

^{*} Specify SQ for square trim.

Glacial I

Features:

Architectural grade in-ground uplight series with deep reflector 45° cut-off angle for visual comfort.

A complete family of round and square luminaires for indoor and outdoor applications.

Latest generation of COB with highly efficient lumens output.

Slim trim with 2mm thickness, makes almost fat with floor surface.

Superb choice of reflectors with narrow beam angle of 10° to wide flood of 60° wide range of wattages from 5W to 25W.

316L Stainless steel trim for longevity in harsh environments, suitable for corrosive areas.

IK10 rated, 10mm thick tempered glass, thermal shock and impact resistant. 5000Kg load bearing capacity.

Lower temperature on luminare's surface, suitable to install in pedestrian traffic area.

Life: 50,000 hours L90/B10.

Loop in/out cables and IP68, PG9, PVC glands as option.

Option of remote low voltage LED driver for safe installation.

Gardens, pathways, walkways, landscapes, approach light, entrances, amenity and car park lighting.

Options

- Dimming: DALI and DSI dimming 1-10V dimming

- CRI 90+

- Color Temperatures : 3000K, 4000K and 5000K

- Matt black and matt silver grey colour finish

Features:

Slim rectangular bollard 15W LED light.

Architecturally designed with slim profile rectangular head frame and body.

Reflector ensuring indirect light distribution at 120°.

Latest generation of LED's from Cree CXA 1512.

DuoPont outdoor electrostatic powder coating paint with high corrosion resistances.

Stainless steel fasteners and fixing screws.

Zero upward lighting avoiding light pollution.

Easy to install with flange base.

Fixture supplied with flange base as standard, anchor bolts kit optional.

Manly

Features:

Decorative 45W LED lantern.

Architecturally designed with square head frame with open middle section to create aesthetically appealing design.

Latest generation of LED's from Cree CXA 2530.

DuoPont outdoor electrostatic powder coating paint with high corrosion resistances.

Reflector ensuring indirect light distribution

Ingress protection IP65.

Stainless steel fasteners and fixing screws.

High purity extruded aluminium body.

Available in two lengths 3000mm and

Zero upward lighting avoiding light pollution.

Easy to install with flange base.

Fixture supplied with flange base as standard, anchor bolts kit optional.

50,000 hours life L70.

^{*} Specify for other colour temperatures.

Materials

High quality die cast aluminium alloy body with corrosion resistance powder coated paint finish to RAL 9006. Other colours available on request, IP66 rated sealed LED modules with extruded aluminium heat sink.

Applications

Cycleways, car parks, street lighting, access roads, amenity lighting and large open areas.

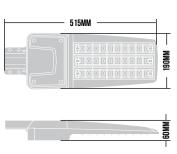

Options

- Dimming: DALI and DSI dimming 1-10V dimming

- CRI 90+

- Color Temperatures : 3000K,

4000K and 5000K

Features:

Sleek smart design makes this fixture a solution for all types of internal roads and open car parkings.

High resolution specially designed optically controlled lenses with each LED source to precisely control the light output.

Supplied in 5000K cool white as standard, other colour temperatures available on request.

Dimming and photocell options available for extended energy savings.

Overall uniformity and longitudinal uniformity makes Stretto the best choice of designers and authorities.

Fully adjustable beam angles for orientation and tilt to best suit the design.

Suitable for various arm bracket combinations.

50,000 hours life L70.

LuxeLED

Atlantis

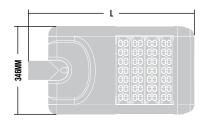

Features:

Innovative LED street luminaire using the most advanced LED technology.

Reduce CO2 emissions, provide energy savings and no maintenance.

Fully sealed IP66 rated.

Sleek seamless with no visible screws.

Built-in chimney effect heat dissipation structure with self cleaning function.

High resolution specially designed optically controlled lenses with each LED source to precisely control the light output.

Supplied in 5000K cool white as standard, other colour temperatures available on request.

Dimming and photocell options available for extended energy savings.
